Personal injury could result from PTO driveline separation

1. Drawbar supplied provides standard distance "A". Do not change.

| PTO RPM      | SHAFT SIZE      | DISTANCE "A"      |
|--------------|-----------------|-------------------|
| 540          | 35 mm (1.38 in) | 355               |

2. Three-point link distance "C" and mounted implement distance "D" may not be standard.

Measure distance "B" over complete lift range for tractor and implement combination. Select driveline length to ensure that driveline will not bottom out at minimum distance "B" and will have sufficient overlap at maximum distance
