PARTS CATALOG GUIDE**I. VEHICLE AND ITS SPECIFICATIONS****A. Automated Line Set Ticket (ALST)**

The LST is the vehicle build record. Each Unit Code represents a group of components or instructions used to manufacture the vehicle. The LST for the truck can be found in the Line Set Ticket Section of this Catalog

A. Understanding the Automated Line Set Ticket (ALST)

Since 1974 the Chassis Build Date has been stamped on the capacity plate of the truck, in the section called Date Mfg. This information has been used since 1974 in the Master Parts Catalog to identify parts differences due to design change. This is necessary since trucks are not always built in Chassis Number sequence. The Chassis Build Date is also stamped on all LST copies, except for the reduced size.

The number as stamped on the capacity plate is structured as follows:

9 - 8 - 75 - 1
MONTH DAY YEAR SHIFT

character position 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17

Info

II. CATALOG SECTIONS

A. Front Page

Page 1 of the catalog contains some general information about the current chassis, including the identity of the original Purchaser, the Chassis Model and the Date the chassis was manufactured. It also contains CopyRight information for the catalog.

B. Parts Catalog Contents

The Parts Catalog Contents Section contains a listing of the Figures contained in the Catalog and their associated page numbers in the Catalog. This can be used, with a printed catalog, to locate a specific Figure. You may mouse double-click on an individual Figure to go directly to that Figure in the Catalog, when using the Electronic Catalog.

C. Parts Catalog Guide

The Parts Catalog Guide Section (the section you are now reading), contains information and instructions on how to easily use the Catalog, whether you are using it on-line or using a printed Catalog. Complete instructions for Navigating through the catalog using the Navigation Bar, finding parts by Part Number or Description and how to print a Catalog are covered in this Section

D. Line Set Ticket

This Section contains the information contained in the Chassis Line Set Ticket. The first section gives the features of the Chassis, including Model, Dimensions, Build Data and other information of importance.

After the initial features are listed, the Line Set Ticket lists each of the Component Group Indexes, followed by each Unit Code contained within the Component Group. Some of the Unit Codes will be followed by (Cost Code).

This indicates the Unit Code is a Cost Code, and will have no Figures, Reference Figures or Data Information associated with it.

E. Component Groups 01 through 17

There are 17 Component Group Folders show in the Bookmarks Window. By clicking the mouse on the Box [+] to the left of each Component Group Folder, you may open the Folder and display the Figures and Reference Figures contained in the Component Group. There are two types of figures shown, that can be distinguished by their different Icons. The first type of figure is a Figure, that has the following Icon associated with it:

You can open the Parts Detail associated with the Figure by double-clicking the mouse on the Figure Icon. This will cause the parts detail of the Figure and a Parts Illustration (if not a Non-Illustrated Figure) to be displayed on the screen.

Figure Icon

You can open the Parts Detail associated with the Figure by double-clicking the mouse on the Figure Icon. This will cause the parts detail of the Figure and Parts Illustration (if not a Non-Illustrated Figure) to be displayed on the screen.

PARTS CATALOG GUIDE

Each page of the Figure Parts Detail will contain one or more rows of information, contained in the columns shown below:

Item	Part#	Qty	Description	Kit	Var	Fig
005	1664568C95	1	CROSSMEMBER, CAB OR BODY MTG			1664568C95
	1664568C95	1	FOR PARTS LIST SEE 1664568C95			1664568C95
025	1664608C3	1	CROSSMEMBER		03ZN2	1664608C3
	1660004C2	1	CROSSMEMBER, REAR		03ZN2	1660004C2
	1660004C2	1	SEE NOTE 2		03ZN2	1660004C2
030	414053C1	6	BOLT, HEX-HD 1/2-20UNF X 1-3/4 IN.		03ZN2	

The first column is a reference number used to find the part on the Illustration (if not a Non-Illustrated Figure), the second column is the Part Number, the third column contains the number of the items used, the next column contains the Part Description, the fifth column contains any Kit References, the sixth column contains the Variation Number and the last column contains references to either Illustrated or Non-Illustrated Figures, that provide more detail by exploding the part.

The third line refers to a Reference Figure. Reference Figures are designated by being colored green in the Figure Parts Detail Lines. Examples are lines 3, 4 and 5 in the Parts Figure Detail shown above. Reference Figures have their own Parts Illustration and detail. All Reference Figures associated with a Figure are shown immediately below their parent Figure in the Bookmarks Window. They have the following Icon associated with them;

Reference Figure Icon

Notice that line 1 and 2 of the Parts Figure Detail shown above are colored red. This indicates they are Non-Illustrated Reference Figures. These may be present in either Figures or Reference Figures. Although these items do not have an illustration, they do contain additional detail about the part. These items are expanded below all other parts in either a Figure or Reference Figure Parts Detail listing at the end of the listing, as shown below:

NON-ILLUSTRATED REFERENCE FIGURE 1664568C95						
001	473323C4	1	CROSSMEMBER, CAB RR			473323C4
002	468836C4	2	BRACKET, CAB MTG XMBR LT			
003	468837C5	2	BRACKET, CAB MTG XMBR RT			
004	414052C1	12	BOLT, HEX-HD 1/2-20UNF X 1-1/2 IN.			
005	414087C1	12	WASHER, HEX-LK			

Notice that the Reference Figure 479929C4 shown in the above Non-Illustrated Reference Figure. This is the green line. This Reference Figure will be listed in the Bookmarks Window, immediately after the Figure. Non-Illustrated Reference Figures may also contain references to additional Non-Illustrated Reference Figures. In this case the lines will be red. These Non-Illustrated Reference Figures will be expanded at bottom of the Figure

Some Figures and Reference Figures will make reference to kits. The kit reference will be shown in the Qty column as "KT". This will be followed by (CONSISTS OF PARTS DENOTED BY KA) where KA is the kit identifier. There may be several kits in a figure detail, each denoted by a different kit identifier, ie: KA, KB, KC, etc. This can be seen on the next diagram.

Alias Figure Icon

An Alias Icon represents a Figure that is in another section of the catalog. Clicking on the Alias Figure will take you to that section. For example: You may be looking for vehicle brakes. On a front wheel driving axle, the brakes may be in Section 02 - Front Axles. This lets you find the brakes in Section 04 - Brakes, where you may expect them to be.

PARTS CATALOG GUIDE

Item	Part#	Qty	Description	Kit	Var	Fig
004	56121R3	2	SEAL, BRAKE CAMSHAFT			
005	1693181C1	1	RING, O BRAKE SPIDER			
006	983622R1	2	PIN,BRK SHOE ANCHOR

	1693188C91	KT	(CONSIST OF PARTS DENOTED BY KA)			
871	KSR3014707	KT	KIT, BRK SHOE W/LINING			
	KSR3014707	KT	(CONSIST OF PARTS DENOTED BY KB)			

Info

Notice the kit identifiers KA and KB in the Kit column of the Figure Parts Detail. This indicates that the part containing the kit identifier in the Kit column is contained in the indicated kit. In this case 2 "LINING, BRAKE SHOE" and a "RIVET,BK SHOE LINING" are contained in the kit with kit identifier KA.

The Appendix Section of the catalog contains three sections. The first section is the List of Abbreviations. This section contains, listed in alphabetic order, abbreviations that are used in the catalog. This provides a quick lookup for users who may encounter an abbreviation that they do not understand.

The second section contains, listed in alphabetic order by Part Description, a complete listing of all parts referred to in any section of the catalog. This is titled Part Description Index.

The final section contains, listed in ascending part number order, a complete listing of all parts that are referred to in any section of the catalog. This is titled Part Number Index.

When using either the Part Description Index or the Part Number Index, you may go directly to the Figure or Reference Figure containing the part, by double-clicking the mouse on the line containing the part.

III. NAVIGATING THROUGH THE CATALOG

The two primary methods of navigating through the catalog are the Bookmarks Window and the Navigation Bar. A portion of the Bookmarks Window is shown in the next diagram.

PARTS CATALOG GUIDE

The Bookmarks Window contains a folder for each Catalog Section. Typical folder Icons are shown below. The Icon on the left is in the closed position, this is indicated by the small plus sign inside the box. The Icon on the right is in the open position, this is indicated by the small minus sign inside the box. To open or close a folder, simply click the mouse with the cursor positioned over the small box containing the plus and minus signs.

 02 Front Axle (Folder Closed)  02 Front Axle (Folder Open)

Each folder will normally contain one or more page Icons. In some cases a Group folder may be empty. This will occur when no items in the Group are installed on the Chassis. There are three types of page Icons. They represent individual pages in the catalog. To display the page represented by a page Icon, position the cursor over the page Icon of interest and double-click the mouse button. The three types of page Icons are shown below:

 (Information)  (Figure)  (Reference Figure)  (Alias Figure)

The Information Icon represents all pages except for the Figure, Reference Figure and Alias pages. For example, the Catalog Index, Part Description Index and Part Number Index are represented by Information Icons.

The second method of navigating through the catalog is by using the Navigation Bars. These are dockable bars located at the top and right of the Custom Parts Catalog Window. The Navigation Bars are shown below:

The Navigation Bars can be divided into six functional sections: Printing and Opening Files, Catalog Browsing, Catalog Searches, Section Browsing, History, Copy/Append and Zoom:

Open File and Print Catalog Buttons

The Printing Function is used to print a copy of the catalog. It's use is covered later in this section of the catalog. The File Button is used to open a new Chassis File.

Copy and Append Buttons

Zoom-In and Zoom-Out Buttons

The Clipboard Copy and Append Buttons are used to copy and append data to the System ClipBoard. The Zoom-In and Zoom-Out Buttons are used to select a normal or full screen view of a Catalog Page. The use of these four buttons is explained later in this catalog section.

Catalog Browsing Arrows

The Catalog Browsing Arrows are used to browse through the catalog one page at a time. The Previous Page Arrow (on the top) is used to move one page back and the Next Page Arrow is used to move one page forward in the catalog. If you are at the first page of the catalog, the Previous Page Arrow will be disabled. If you are at the last page of the catalog, the Next Page Arrow will be disabled. The Browse Arrows are located below the right scroll bar, in the bottom right corner of the screen.

Catalog Search Buttons

The Catalog Search Buttons are used to do searches for specific part numbers or descriptions when a Figure, Reference Figure, Part Description Index page or Part Number Index page is being viewed. Their use will be explained later in this section.

PARTS CATALOG GUIDE

A section is a group of pages associated with one of the major catalog sections. For example all of the pages contained in the Line Set Ticket Group are contained in the Line Set Ticket Section, all of the pages associated with a Figure or Reference Figure are contained in the section for that particular Figure or Reference Figure.

The Section Page Browse Buttons are used to browse through the pages of a section. When you are displaying the first page of a section, the Section Previous Page Button (button on the left below) will be disabled. When you are displaying the last page of a section, the Section Next Page Button (button on the right below) will be disabled. These two buttons are used in all sections:

Section Page Browse Buttons

The Figure or Reference Figure First Page button (button on the left above) is only used when Figures or Reference Figures are being displayed. When displaying other sections, this button will be disabled. This button is used to return to the first page of a Figure or Reference Figure Section. This allows you to quickly go to the first illustration for a parts illustration reference. Some Figures and Reference Figures have more than one illustration associated with them. This button will return you to the first illustration in the section

The Section Browse Buttons will be disabled if a Figure or True Figure section is being displayed and the figure information is contained in only one page.

The History Browse Buttons (shown below) are used to navigate to screens previously visited. Items selected by clicking on an item in the Bookmark Window, the Parts Contents Section, the Part Description Index or the Part Number Index are added to the history record.

History Browse Buttons

The History Browse Buttons can be very useful when switching from either the Part Description Index, Part Number Index or Contents Section to Figures and then back to the preceeding section

The methods that can be used to display a Figure or Reference Figure are:

- Double-click with the mouse positioned on the appropriate icon in the Bookmarks Window
- Browse through the catalog using the Catalog Browse Arrows
- Double-click on a line in the Part Description Index
- Double-click on a line in the Part Number Index
- Double-click on a Figure line in the Parts Catalog Contents Section

IV. SEARCHING FOR CATALOG ITEMS

You may search three sections of the catalog for part number, descriptions or any character string. The three sections that can be searched are Figure or Reference Figures, the Part Description Index or the Part Number Index. The Search buttons will be disabled when any other section of the catalog is being displayed. Searches are done using the three buttons shown below. They are located on the Navigation Bar:

Search Buttons

To start a search click on the Search Button (button in the middle above). This will bring up the Enter Search String dialog, that is shown below. Enter the string you wish to find, and press Find on the dialog. If the string is not found in the section, a second dialog will be displayed advising you that the string you entered was not found. The search string is not case sensitive. You may enter gasket or Gasket, and all occurrences of gasket will be found.

PARTS CATALOG GUIDE

Three search options are available:

All Matches:

All occurrences of the search string, including those embedded in words, will be found.

Whole Words:

Multiple words can be entered, in any order, and the search will find lines containing those whole word combinations. For example ("nut size hex" will find the line containing "nut, hex Give Size")

Exact Match:

Only exact word matches, of the entered string, will be found.

If the search string was found in the section being searched, all occurrences of the search string will be highlighted on the first page that the search string was found. The first search item found will be highlighted in blue and other finds will be highlighted in yellow. If there is more than one item found, the Search Forward button (button on the right above) will be highlighted. If you click on the Search Forward Button the selection will move to the next location of the string in the section. At this point, the Search Back Button (button on the left above) will be enabled, allowing you to move back to the previous position. If you are at the first position of the search string in the section the Search Back Button will be disabled. If you are at the last location of the search string in the section, the Search Forward Button will be disabled. If there is only one occurrence of the string in the section both the Search Back and Search Forward Buttons will be disabled. A typical search result, for the search string "filter" is shown below:

Part No.	Description	Group	Figure	Page
1618318C91	GENERATOR, 12V 160 AMP	8	00198	159
1618386C91	FILTER, FUEL & WATER SEPARATOR	15	03SL0	394
1618386C92	FILTER, FUEL	15	03SL0	394
1618585C1	BRACKET, REAR MIRROR MTG	16	02P67	506
1618678C91	LIGHT ASSY TURN SIGNAL LH AMBE	8	02J82	132
1618679C91	LIGHT ASSY TURN SIGNAL RH AMBE	8	02J82	132

If you place the mouse on the selected (blue) search line and double-click the mouse button, the Figure 03SL0 will be displayed on the screen. This feature is only available when doing a search in the Part Description Index or the Part Number Index section, and is not available when you are doing a search in a Figure or Reference Figure section.

PARTS CATALOG GUIDE

Your Custom Parts Catalog can be printed on any Windows compatible printer, capable of printing color or grey scale. It is recommended that you print the catalog in color so as to not lose Reference Figure and Non-Illustrated Reference Figure color indicators. To print your catalog, simply click on the Print button on the Navigation bar:

**Print Button**

After clicking on the Print button a Print Dialog will be displayed on the screen. The actual dialog look will vary, depending on which printer you are using. A typical print dialog is shown below:

At this point you either click the All button to print the entire catalog or enter the specific pages you wish to print in the From and To edit lines. In the example shown, the user has elected to print pages 1 to 34. After selecting the pages to print, press the Print button

If you have access to a color or grey scale printer with duplex capability, you can print your catalog two sides to a page. This makes a great catalog, and reduces the number of catalog pages by one-half. When printing on a duplex (two sides to a page) printer, be sure that the printer automatically inserts gutters for left and right pages, or can be set to provide page gutters. Even page numbers are left side pages and odd page numbers are right side pages.

When printing a catalog it is easier if you print on paper that is prepunched for the type of binder the manual will be placed into. Prepunched paper is available through your local paper supplier.

PARTS CATALOG GUIDE

VI. COPYING CATALOG DATA TO THE CLIPBOARD

Copy and Append Buttons

You may copy data from three sections of the catalog to the System Clipboard. Data can be copied from the Figure or Reference Figures, the Part Description Index or the Part Number Index. The copied items can then be pasted into a word processor or spreadsheet program. This feature can be useful for preparing parts lists for repair estimates or part orders.

These buttons will be disabled until you select an item or multiple items using standard Windows text selection methods (i.e. click click and extend with the Shift Key and click and add or delete with the Ctrl Key). The Copy button replaces the current clipboard contents with the selection and the Append Button will add the selection to the end of the clipboard.

You can use the Select All (Ctrl-A) to select an entire page of a section. To select the entire section, use Select All for the first page, then go to the last page of the section, hold down the Shift Key and single click on the last line of data.

VII. ZOOMING THE CATALOG IMAGE

Zoom-In and Zoom-Out Buttons

You may use the Zoom-In and Zoom-Out buttons to zoom in and out on the catalog pages. This allows you to see the entire page, when you have selected the zoom out button. To return to the normal view, simply click on the Zoom-In button. Selections and Search details will not be visible when you have selected the Zoom-Out option, but will return when you select the normal view by clicking the Zoom-In button.

VII. THE POP-UP MENU

Click the right mouse button in the main screen to view the Pop-Up menu shown below:

Undo	Ctrl+Z
Cut	Ctrl+X
Copy	Ctrl+C
Append	
Paste	Ctrl+V
Select All	Ctrl+A
Full Page View	
Normal View	

The Pop-Up menu provides you with a quick and handy method to perform the following tasks:

Copy, Append and Select All

These options, explained earlier in this section, are only available when you have a Figure Reference Figure, Description Index or Part Number Index view selected.

Full Page View and Normal View

These options allow you to quickly toggle the view between Full Page and Normal.

PARTS CATALOG GUIDE**IX. ELECTRONIC PARTS CATALOG INFORMATION**

This catalog is available in electronic form delivered on CD-ROM format. It is available in the of the following format:

Microsoft Windows**Minimum System Requirements for Microsoft Windows**

Windows 98, Windows 2000 or Windows XP
1029 X 768 Pixel Monitor
16 bit Color
CD-ROM Drive

To order an electronic form of the catalog, contact your International© Dealer, who will provide you with complete ordering information

HOSE, ASSEMBLY COMPONENTS**EXPLANATION OF 10-DIGIT CODE (Example: B100920006)**

The following example explains the make-up of the 10-digit code. In this example, the hose material is per SAE J1402B, Type E, TMS-6016. The hose size is 5/8 inch. Assembly is 92 inches, including fittings (actual hose cut-off length is listed in the Conversion Lists and is 89.4 inches). The coil wrap length is 6 inches.

HOSE, ASSEMBLY COMPONENTS
 (By Dash Size)

All of the components used to fabricate a complete assembly are listed by a dash number of reference in the chart below. Always use the part number listed in the Conversion Lists of fabricate assemblies.

Component	-10
Fitting (1) (1)	592 945 C91 200 580 5C1
Bulk Hose (1 ft.)	375 055 C2
Bulk Coil Wrap (1 ft.)	375 048 C1
*Sub Allow For Fittings.	2.6

Figure 2 of 6

EXPLANATION OF THE LOCATION OF PROPELLER SHAFTS AS SHOWN ON LINE SET TICKETS

The 10-digit code numbers are displayed on the Line Set Tickets which are attached to the sun visor and placed in the glove compartment of the truck, and are mailed to the selling dealer. When more than one propeller shaft is used on a truck, they are always listed in the same sequence on the Line Set Ticket as they are positioned on the truck (starting at the front and moving to the rear). Some Line Set Tickets show the position numbers of the propeller shafts.

For example, let's take a long wheelbase 9370 (6 x 4) with an auxiliary transmission. The shafts would be listed in this order: First the shaft from the main transmission to the auxiliary transmission; next, the shaft from the auxiliary transmission to the center bearing; then the shaft from the center bearing to the forward-rear axle; and last, the shaft from the forward-rear axle to the rear-rear axle.

6X4, W/AUXILIARY TRANSMISSION
AND ONE CENTER BEARING

Exceptions to the procedure are: (1) Trucks with front driving axles (6 x 6 or 4 x 4). The shaft from the transfer case to the front axle is always listed last on Line Set Tickets for these trucks. (2) 1853FC and 3900FC models (forward-control school buses) with three center bearings list the third shaft last - the one between second and third center bearings - after the rear shaft.

This cross-reference can be used to determine the part numbers of the propeller tube assembly, slip yoke, and the U-joint kits without requiring and information other than the 10-digit code number of the production shafts as shown on the Line Set Ticket.

EXPLANATION OF 10-DIGIT CODE (Example: R201101021)

The following example explains the make-up of the 10-digit code. In this example, the first position of the part # "R" represents the cable color, Red. The second and third position of the part # "20" consists of the cable part #, 2643729R1 (00GA). The fourth position of the part # "1" consists of terminal #1 part #, 475961C1. The fifth position of the part # "1" consists of terminal #2 part #, 475961C1. The sixth position of the part # "0" indicates there is no conduit. The seventh position of the part # "1" indicates how the terminals are situated. The remaining positions of the part # "021" represents the length of the cable assy, which is 021cm.

HOSE, ASSEMBLY COMPONENTS

Figure A000000000

EXPLANATION OF 10-DIGIT CODE (Example: A061170024)

The following example explains the make-up of the 10-digit code. In this example, the hose material is per SAE J1402B, Type E, TMS-6016. The hose size is 3/8 inch. Assembly is 117 inches, including fittings (actual hose cut-off length is listed in the Conversion Lists and is 115 inches). The coil wrap length is 24 inches.

**HOSE, ASSEMBLY COMPONENTS**
(By Dash Size)

All of the components used to fabricate a complete assembly are listed by a dash number of reference in the chart below. Always use the part number listed in the Conversion Lists of fabricate assemblies.

Component	-04	-06	-08	-10	-12	-16	-20
Fitting (2) Req'd	592 942 C91	592 943 C91	592 944 C91	592 945 C91	592 946 C91	375 161 C2	407 994 C2
