THE CONTINUED BENCHMARK IN PERFORMANCE AND PROFITABILITY

Kenworth's T680 is a true game changer in the business of running trucks at a profit. Aggressive aerodynamic design. A fully integrated, highly efficient PACCAR Powertrain. Uptime engineering that results in an unmatched work ethic. Plus a level of luxury, craftsmanship and intuitive control that makes the T680 The Driver's Truck™ — a factor that helps every Kenworth fleet attract and retain the industry's best operators.

REWARDING

T680 ADVANTAGE

<https://truckmanualshub.com/>

THE CUTTING EDGE JUST GOT A WHOLE LOT SHARPER.

Start with the most highly evolved aerodynamic long-haul tractor, the Kenworth T680. Add special factory-installed aerodynamic enhancements for the tractor that combine to reduce drag to an absolute minimum. Optimize the powertrain with the fuel efficient PACCAR MX-13 engine, PACCAR transmission and PACCAR drive axles. Incorporate Kenworth's Idle Management System, which eliminates the need to run the truck for off-duty temperature control. And integrate real-time reporting technology to help the driver run in the sweet spot for maximum fuel efficiency. Kenworth luxury, craftsmanship, reliability and driver satisfaction also come as part of the deal.

KENWORTH
THE WORLD'S BEST.

T680

- Most advanced and aerodynamic truck ever produced by Kenworth
- Front air dams, 19 inch side extenders and chassis fairing extenders, rear sleeper fairing design and exhaust cut-out covers are standard.
- Optional front wheel well closeouts
- Optional aerodynamic enhancements:
 - Wheel covers
 - Tandem fairings

Fuel Saving Intelligence:

- Predictive Cruise Control
- Predictive Neutral Coast
- Driver Rewards
- Driver Shift Aid
- Driver Performance Assistant
- Engine Idle Shutdown
- Tire Pressure Monitoring System

Kenworth Idle Management System:

- No-idle sleeper air conditioning system
- Optional fuel fired heater
- Optional auto start/stop system

PACCAR ENGINES

- 13-liter and 11-liter displacements available to meet all applications
- High efficiency performance for optimized fuel economy
- High pressure common rail fuel system
- Compacted graphite iron (CGI) for improved strength and reduced weight

PACCAR TRANSMISSION

- 12-speed automated
- Fully integrated with PACCAR Engines
- Intelligent shifting for superior drivability
- Lightweight design

PACCAR AXLES

- Lightweight design
- High efficiency 6x4 drive axles to improve fuel economy

430	1,650 @ 900

Powering the Kenworth T680 are the high quality and reliability of the PACCAR MX engines. The 12.9-liter PACCAR MX-13 engine is designed to meet the demands of linehaul heavy-duty truck applications — delivering the increased horsepower and torque needed to move large payloads with ease, even on steep grades. The 10.8-liter, PACCAR MX-11 engine is perfect for weight sensitive pickup and delivery, less-than truckload and regional applications.

KENWORTH
THE WORLD'S BEST.

PACCAR MX-13

Configuration	Inline 6-Cylinder
Displacement	12.9 Liters
Dry Weight	2,600 Lbs.
Horsepower	405-510 HP
Peak Torque	1,450-1,850 lb.-ft.
B10 Design Life	1,000,000 Miles
Base Warranty [§]	2 Years / 250,000 Miles

INTELLIGENT

PRODUCTIVE

AS BEAUTIFUL AS THIS TRUCK IS, IT'S EVEN MORE SATISFYING TO DRIVE.

One look and you know: A Kenworth T680 is The Driver's Truck™. Its bold, sweeping lines wrap a world-class cabin equal to fine automobiles. Where groundbreaking technology and true ergonomic comfort elevate the driving experience while reducing fatigue. Where space, elegant design, fine craftsmanship and an abundance of luxury details define the environment. And where drivers can feel completely at home wherever the road might take them.

DRIVER PERFORMANCE CENTER

To drive a truck efficiently, drivers must track fuel, vehicle and safety systems performance on the go. But good information isn't the only thing the Kenworth Driver Performance Center offers. The quality, clarity and visual in real-time presentation also means a lot when you're focused on the road. The 5-inch full color, high resolution screen is an industry first. At a glance, it tells you everything you need to know about operating in the sweet spot between performance and efficiency. Truck diagnostics and performance indicators pop up to alert the driver. Trip details and multi-route comparisons allow them to maximize performance every day.

KENWORTH
THE WORLD'S BEST.

KENWORTH
NAV+ HD

NAV+ HD is an in-dash display designed specifically for life on the road. Consider it your personal assistant. With a simple touch to the high-resolution 7-inch color screen – or a spoken command – you have direct access to a full range of valuable and productive features: Truck-specific navigation, roadside assistance, vehicle data, hands-free calling, audio controls (including satellite radio, AM/FM/CD/MP3/USB/Bluetooth), blind-spot camera inputs and the internet. NAV+ HD. Enjoy the road.

On-board navigation is becoming commonplace, but the NAV+ HD is the first system in the industry to offer optimized routes customized to your truck parameters and your load.

With Google Chrome, choose from results and suggestions that appear as you type, including your recent searches and visited websites while Autofill lets you complete forms with just one tap.

NAV+ HD makes adding a camera system quick and easy. Real-time screen views for up to four cameras are directly and instantly accessible.

Pre-loaded virtual gauges include oil temperature, transmission temperature, manifold boost, present and average fuel economy, DPF status and engine torque.

NAV+ HD audio features AM/FM/Weather bands, CD player, USB port for memory devices containing MP3 or audio files, and Bluetooth wireless audio streaming from Bluetooth-enabled devices.

NAV+ HD integrates Bluetooth wireless technology with an in-cab microphone and speaker. Just pair it with your compatible Bluetooth phone and talk hands-free.

T680 76-Inch Diamond VIT Sleeper

T680

Driver's Studio

<https://truckmanualshub.com/>

The T680 includes the optional 'Driver's Studio' package, a set of premium options that help create a luxurious home-away-from-home living experience for the driver while out on the road for extended periods of time.

The Drivers' Studio includes the 180-degree swivel passenger seat and swivel table option set, which maximizes the driver's living space by combining the cab and sleeper into a large studio, allowing the driver to relax in comfort in the passenger seat rather than being confined only in the back of the sleeper. It also allows for viewing of the TV from the passenger seat or the bunk.

Convenient LED lighting provides ample interior light throughout the sleeper and an LED light directly above the swivel table with an independent light switch creates a brightly lit workspace.

To maximize stand-up room in the sleeper, a pull of the latch unlocks the table which may be rotated 90 degrees above the bunk, also giving you easy access to the drawers below.

The Driver's Studio includes a swivel TV mount ideal for flat screen TVs up to 28", a premium audio package with 320-watt amp, 10-inch subwoofer and 8 speakers, and the optional EpicVue pre-wire for satellite TV.

KENWORTH
THE WORLD'S BEST.

Large capacity, drawer-style refrigerator/freezer mounted at mid-level for wide open access without bending over.

For dining, the Driver's Studio includes both a drawer-style refrigerator and a convenient space ideal for a microwave. The 1800-watt inverter includes up to four standard 120 volt outlets to power the microwave, a DVD / BluRay player, gaming consoles, laptops and other electrical devices.

The Driver's Studio also includes abundant storage space, including a full-size wardrobe for hanging clothes, multiple drawers and cabinets, and a large storage space under the lower bunk.

A spacious on-top organizer for keys, cell phone and other necessities; hand-hold cubby for stable access to upper bunk.

The sleeper control panel is a convenient central location for all the items you need to control the sleeper environment, along with entertainment and interior lighting.

There are two control units on the sleeper panel. One for the heater and air conditioning and the other for the optional 1,800 watt inverter. The no-idle control provides automatic temperature control in both a battery based air conditioning and a diesel fired heater mode. The inverter control switches the optional power inverter on to provide hotel power and battery charging.

<https://truckmanualshub.com/>

76-Inch High-Roof Sleeper

The Kenworth T680 with a 76-inch sleeper is the ultimate driver's truck. Offering a spacious, modern and elegant interior with configurable options that personalize — and heighten — the driving experience. It's also a great place to work or just relax.

76-Inch Mid-Roof Sleeper

For lower-profile and weight-sensitive applications, the Kenworth T680 with a 76-inch mid-roof sleeper reduces weight by 100 lbs. The spacious sleeper can be ordered with either the optional back wall storage system or folding upper bunk to meet your individual needs.

<https://truckmanualshub.com/>
52-Inch Mid-Roof Sleeper

When the schedule requires a short layover, the Kenworth 52-inch sleeper is a welcome sanctuary. It measures 8 feet wide with a generous walk-through and stand-up-and-stretch headroom. It is also available with an aerodynamic roof fairing.

40-Inch Flat Top Sleeper

For applications where length and tare weight are at a premium, Kenworth's 40-inch sleeper is a perfect match. It offers a compact, yet comfortable sleeping environment, 22 cubic feet of storage space, overhead shelves, a cell phone cubby and extra large coat hooks specifically designed to hold hard hats as well as coats.

INTERIOR COLORS AND OPTIONS

The T680 is available in two interior trim levels, the Vantage and the Diamond VIT. Offered in Slate Gray or Tan, either choice comes with three shades of vinyl plus a complementary trim color.

T680

BOLD

INTELLIGENT

PRODUCTIVE

A TRUCK THIS ADVANCED WILL TAKE YOU PLACES YOU'VE NEVER BEEN.

The T680 employs a suite of technologies and design features that elevate the driving experience to new heights of safety, efficiency and satisfaction. These intelligent support systems empower the driver to make better, more informed decisions, remain connected 24/7, and dial in the perfect work environment. At the end of the day, this is all about helping the driver feel less fatigued and more fulfilled.

REWARDING

T680

Driver Assistance Systems

<https://truckmanualshub.com/>

ADAPTIVE CRUISE CONTROL

Adaptive cruise control (ACC) can make driving trucks safer and less fatiguing. Integrated with your normal cruise control system, ACC “reads” traffic conditions via front-facing radar sensor and modulates the throttle and the brakes to keep your truck at a pre-set distance from the vehicle in front of it. Then, when the road is clear, the system will re-accelerate the vehicle back to the set speed.

LANE DEPARTURE WARNING

Kenworth's lane departure warning system helps combat lane drift due to fatigue and distractions. The system continually monitors the truck's location related to lane markings and automatically emits a distinctive audible warning whenever an unintended lane change (unsigned) is detected — alerting the driver to make a correction.

COLLISION MITIGATION

At 60 MPH, a vehicle is traveling at 88' per second, or the length of a football field in 3.4 seconds.

Far beyond a mere warning system, Kenworth collision mitigation detects when the truck may be about to collide with another vehicle or object, alerts the driver and takes pre-emptive braking action — when necessary — to avoid or considerably reduce the severity of a crash.

SIDE OBJECT DETECTION

The side object detection system continuously monitors a truck's blind spots and provides the driver with audible and visual alerts when an object or vehicle has entered these zones — invaluable when making a lane change or negotiating tight delivery sites.

DRIVER PERFORMANCE ASSISTANT

Standard on every Kenworth with a PACCAR MX-13 engine, the Driver Performance Assistant module monitors and scores driving technique in real-time — encouraging behavior that supports better fuel economy and longer brake life. The system coaches improvements by showing drivers how to best optimize the truck's performance — by coasting longer, utilizing the engine brake, anticipating the road ahead and braking with less force.

PREDICTIVE CRUISE CONTROL

Predictive Cruise Control employs GPS and 3D digital map technology to anticipate changes in grade up to a mile ahead. Using those inputs, the technology automatically modifies the standard cruise control response when paired with the PACCAR transmission. Predictive shifting optimizes gear selection and shifts into neutral on downhill grades for even greater fuel efficiency in order to maximize fuel economy.

T680

<https://truckmanualshub.com/>

Power Management Technology

KENWORTH IDLE MANAGEMENT SYSTEM

Kenworth's factory-installed, battery based no-idle system is designed to help long-haul fleets in hot and cold climates to reduce idling time and fuel usage without compromising performance. As a split system, Kenworth's factory installed option provides one of the smallest footprints in the industry, allowing for maximum storage under the bunk. It also features on-board diagnostics, full automatic temperature control in A/C and heating modes, a digital LCD display that makes it easier for drivers to control the unit, and provides battery monitoring capabilities.

The user interface control with a LCD display conveniently located on the sleeper control panel provides automatic temperature control in both A/C and Heating modes.

The remote condenser with brushless fan assembly is installed centrally on the upper exterior wall for optimum performance.

When the weather gets cold, Kenworth's optional under bunk heater will keep you warm while using as little as 0.02 gallons of diesel per hour.

Four Group 31 batteries, electrically isolated from the truck, power the system.

The compact brushless DC compressor and evaporator assembly is strategically located in the sleeper storage area.

KENWORTH
THE WORLD'S BEST.

AUTO START/STOP

Auto stop/start enables operators to use climate control systems and other hotel loads without interruption while parked and prevents fuel from gelling in cold climates. All, without unnecessary idling. The benefits in fuel savings, reduced maintenance, environmental compliance and driver satisfaction can be substantial.

The system automatically starts the engine if batteries run too low or the engine becomes too cold, then turns the engine off once conditions have met preset parameters — a smart way to manage off-duty charging requirements without idling the truck unnecessarily.

SLEEPER POWER PACKAGE

Kenworth's optional 1800 watt inverter lets you plug into shore power to run hotel loads while charging the batteries. Available with 52- and 76-inch sleepers, the inverter is mounted under the bunk on the rear wall to maintain unobstructed access to the toolbox. The package includes four 120 volt outlets — two in the sleeper for appliances such as microwave, TV or your laptop and two on the inverter itself (easily reached through the toolbox door). The system also comes with an on/off switch and battery status indicator conveniently located on the sleeper control panel.

ULTRA CAPACITOR STARTING SOLUTION

The ultracapacitor-based engine start module (ESM) provides dedicated power to start the truck, freeing system batteries to concentrate on powering everything else. Designed to last far longer than regular batteries, the ESM is dedicated and wired directly to the starter. So even if the system batteries are severely discharged, the ESM stays full up and ready to crank.

Since the ESM is ultracapacitor based, it only takes one ESM to crank up to a 15L diesel engine in the harshest weather.

T680

Connected Truck

<https://truckmanualshub.com/>

ACCELERATE DIAGNOSTICS. EXPEDITE REPAIRS. STREAMLINE COMMUNICATIONS.

It's been shown that up to 80 percent of every service event consists of poor or slow communications and processes — lost time, effort and assets that could be better utilized moving your business ahead. Introducing KENWORTH TruckTech+ Remote Diagnostics and Service Management, a revolutionary, fully integrated system designed to streamline every aspect of fleet maintenance.

The benefits of TruckTech+ begin before your vehicle ever enters the service bay. Kenworth's innovative remote diagnostics technology helps you diagnose and solve potential problems — before they impact your operation.

**KENWORTH
TRUCKTECH+**
Remote Diagnostics

- Instant notification of actionable engine and aftertreatment fault information so you can make decisions in real time
- Proactive diagnostic and repair planning assistance with detailed analysis of critical fault codes — before the truck arrives at the dealership
- Once in the shop, PACCAR's proprietary "diagnostic reasoning" engine helps technicians accelerate fault guidance and diagnostics — the first time.

Truck in the Field

When an engine fault code is triggered, TruckTech+ Remote Diagnostics sends a notification to the fleet operations manager and to designated Kenworth dealers immediately.

Fleet Operations

The fleet operations manager will have enough information to determine the course of action, whether to direct the driver to keep driving, or proceed to a Kenworth dealer to be serviced.

Kenworth Dealer

Kenworth dealers will have visibility to the fault code diagnosis prior to a truck arriving in order to expedite service.

Immediate and simple recommended actions are provided to the operator through the Kenworth Driver Performance Center.

The system generates a comprehensive fault report that can be viewed online or emailed to the fleet manager.

Detailed reports are readily available on each truck currently presenting an actionable code. You can filter the information by specific chassis, severity, make, model, year it was manufactured and location.

MAXIMIZE UPTIME AND MINIMIZE THE TRUE COST OF MAINTENANCE.

Much of the downtime associated with truck maintenance can be spent looking up details on a vehicle, leaving messages, returning phone calls, filling out forms, submitting estimates and waiting for approvals. If you want to increase uptime and utilization, reduce the management of service events and trim the true cost of maintenance, you need a system that can help you communicate better information faster and more efficiently. Anytime, anywhere on any device (desktop, laptop, tablet and smartphone) in real time. Welcome to the TruckTech+ Service Management System — a smart, easy-to-use, web-based tool that lets you do in minutes what used to take hours.

KENWORTH
TRUCKTECH+
Service Management

Available throughout the Kenworth PremierCare® service network, TruckTech+ Service Management allows you to manage scheduled and unscheduled service events in real time through a web portal that:

- Speeds communications and keeps everything organized – notes, emails, time and date-stamped activity, and electronic approvals
- Eliminates error-prone data entry and the need to access multiple systems or portals
- Centralizes and makes easily accessible all asset information – build, service history, warranty and product updates.

Schedule, monitor and manage every aspect of truck maintenance through a single web portal — seamlessly via any device, anywhere, anytime.

Collaborate with your Kenworth service team, review and approve estimates and obtain status reports — real-time.

Optimize uptime like never before by expediting the process of truck diagnostics and repair.

Obtain real-time visibility—and accountability— throughout the entire service event management process via an easy-to-use web-based dashboard that helps streamline decision making every step of the way. For every truck in your fleet undergoing maintenance, regardless of location.

Real-time analytics enable you to more efficiently manage preventive maintenance, breakdowns and repairs. Track service events by make, model and engine as well as specific case attributes, such as stage, status, service location, estimated value, asset type, event status and more.

Real-time decision support tools turn raw data into actionable intelligence. Proactively identifying potential trouble spots and give them the attention they need to reduce downtime, maintenance costs and service interruptions.

KENWORTH ESSENTIALS SUPPORT WHENEVER - AND WHEREVER - YOU NEED IT

The reliability and moneymaking potential of your business relies on the dependability of your support system – another great reason to invest in a Kenworth.

Combining premium Kenworth trucks and personalized local service, PacLease provides customized full-service lease, rental and contract maintenance programs designed to meet the specific needs of customers.

For over 50 years and through all economic cycles, PACCAR Financial has been providing Kenworth owners with innovative financing solutions that can be customized to meet individual business needs.

PACCAR Genuine Parts are first-fit parts that keep a Kenworth as original and reliable as the day it rolled out of the factory. Keep your truck and engine well-maintained with the quality, performance and warranty delivered from PACCAR Genuine Parts.

To view Kenworth T680 operating instruction videos, download the Kenworth Essentials App and access the T680 Driver Academy Videos under The Driver's Truck tab.

For Android devices, scan the QR code above or go to the Google Play Store and search "Kenworth".

For iPhones and iPads, scan the QR code above or go to the Apple Store and search "Kenworth".
