CHASSIS / ENGINE / MAST

Revised: August 2001

The information and specifications contained herein were accurate at the time of publication, but may change without notice for product improvements as required. Due to ongoing product improvements, your model may not exactly match assemblies depicted herein. Komatsu Forklift USA, Inc., its parent company and subsidiaries will not be held responsible for damages due to misuse or inappropriate use of its products.

Send comments, requests for information and other inquiries to:

HOW TO USE THIS BOOK

This book provides the parts numbers and, where available, the illustrations for the various engine, chassis, mast, and other parts. Note that both the gasoline and LP engines (H20-II) are covered in this book.

NOTE: When ordering parts, please provide an accurate model number, serial number, engine serial number and the reading on the service meter (hour meter).

Machine Detail Codes -- The codes shown within parentheses in the Table of Contents, and in some figures, represent forklift truck models as follows:

DETAIL CODE	CHASSIS MODEL
5H	FG15H-16
8H	FG18H-16
5S	FG15S-16
8S	FG18S-16

In each case, the illustration immediately precedes the parts list for a part or assembly. The header at the top of the illustration page provides the following information:

- Figure number (abbreviated as “Fig. ” and followed by an alphanumeric number). Figure numbers are generally in sequence, but in certain instances they may not fall in sequence.
- Part or assembly name

The page number in the footer at the bottom of each page includes an alphabetic character and a number to aid in locating sections or pages. Thus page C-3 is page 3 in the third section of this parts book.

On the parts list page, the information box directly above the parts list displays the figure number and the list of models to which the parts list applies.

Each parts list page has five columns as follows:

Index	The item number of the part in the illustration and in the parts list. No index number for a part means that item has the same index number as the item immediately above it.
Part No.	The number to be used when ordering or identifying parts or assemblies. An asterisk (*) means that this item cannot be purchased separately, but must be ordered as part of the assembly to which it belongs.
Description	The name of the part, sometimes including numerical measurements. A dot in front of the description means this item is a part of the assembly immediately above with no dot in front of it. Two dots in front of the description means that the item is a part of the assembly immediately above with one dot in front of it. If a certain part is listed twice, the description will indicate which part to use on which truck or engine.
Qty	The number of parts required for an assembly. In the case of mast lift cylinders and tilt cylinders, the quantity is the number of items required per mast cylinder assembly and not for the entire truck. The letters “A/R” mean “as required”, as with lubricants.

Serial No. The truck or engine serial number used to qualify the use of certain parts. If a certain part is listed twice, different serial number ranges may be shown to indicate to indicate which part to use on which truck or engine. In the engine sections, no serial number listing means the part or assembly is used on all engines. Other parts or assemblies are assigned to specific engine serial number range.

Codes The codes and part numbers specified in the “Part No.” and “Description” columns represent the following:

- ☐ The part specified in the line above is applicable instead of this part.
- ☒ This part is applicable instead of the part specified in the line immediately above.
- ◆ This part and the part specified in the line immediately above are interchangeable.
- ☒ This part is not supplied anymore. The part specified in the above line is supplied instead.
- The part specified in the “Description” column is applicable instead of this part if it is used as a set.
- ▼ This part is not supplied anymore. The part specified in the “Description” column is supplied instead as a set.
- △ Part supplied as semi-finished. It must be reworked before use.
- ☆ Supplied as a set rather than singly.
- ★ Supplied as a set rather than singly. It is supplied singly by specific dealers only.
- ⊙ Part group. This part is not considered a supply part.
- === The parts surrounded by this line are components of the part group specified above.
- G-1, G-2** Part group numbers.
- KIT** Kit components. Please refer to the service kit table for kit components.

SEE DRAWING 50325 FOR HARNESS DETAILS

KOMATSU SYSTEM

COMPLETE ASSEMBLY

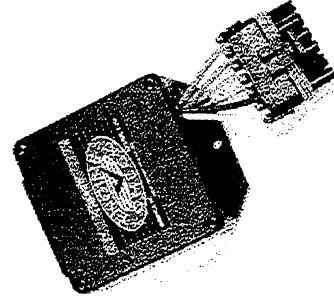

82063

PARTS INCLUDED:

- (1) 70524 UNIT
- (1) 50325 HARNESS
- (1) 30172 TERMINAL FEMALE
- (1) 30173 TERMINAL MALE
- (1) 30222 IMPORTANT LABEL
- (1) FM149 INSTRUCTION SHEET

Note: This unit is exclusive to Komatsu.

The unit will plug into the stock wiring harness. There are space considerations for mounting under dash.

KOMATSU Internal Hosing Kits

Internal Hosing Kit Identification

Komatsu AX Series Forklift Uprights are equipped with two possible internal hosing systems. These systems are not interchangeable. The systems are identified by the color of the hose sheaves. A **WHITE** sheave indicates a Komatsu hose kit. A **BLACK** hose sheave indicates a **CASCADE** hose kit.

PARTS MANUAL

30D Limited Free Lift 2-Stage Mast

***This manual contains standard production
Product Identification Numbers***

30D-MS-001 → 025

Special Engineered Options are not included.

Manual Number 218488

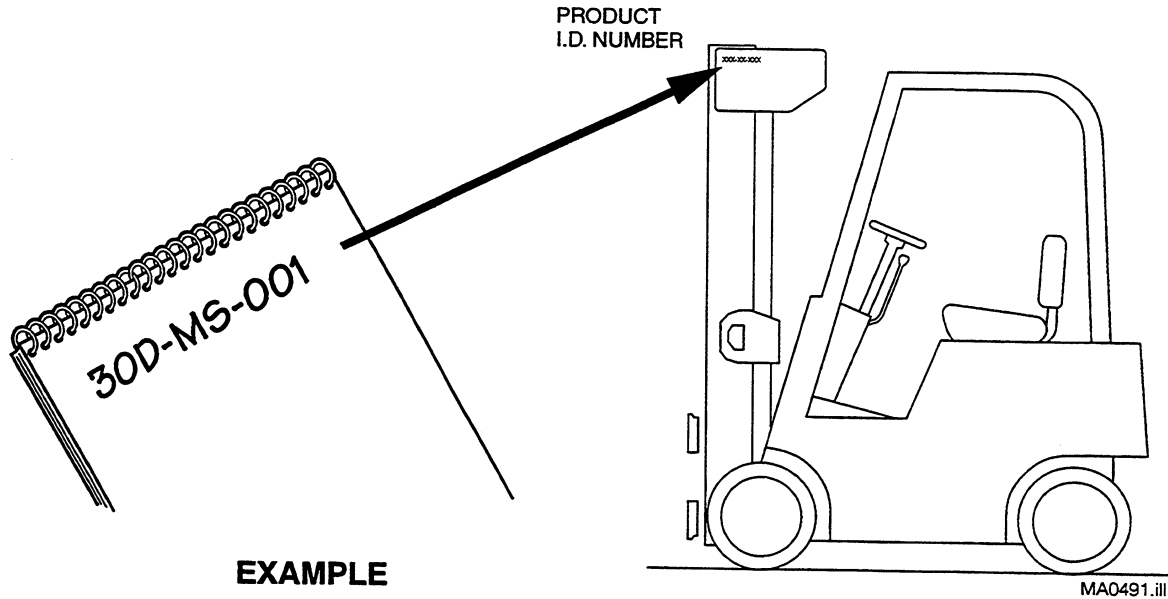

cascade[®]

Cascade is a Registered Trademark of Cascade Corporation

About This Manual

Introduction

This manual shows the parts breakdown for 30D Mast product I.D. numbers. Locate the product I.D. number stamped on the upper left hand side of the outer upright channel. This number must be used when ordering replacement parts for this product.

Ordering Parts

Customers – Cascade parts and service literature is available through authorized lift truck dealers. To place an order, contact the lift truck dealer of your choice.

Lift Truck Dealers – To order parts and service literature contact:

Cascade Parts Sales
2501 Sheridan Avenue
Springfield, OH 45505
Telephone: 888-CASCADE (227-2233)
FAX: 888-329-0234

★ Included in Service Kit 561305.

This diagram illustrates the exploded view of a door handle assembly. The components are numbered as follows:

- 1: Main door frame or panel.
- 2: Vertical support plate or mounting bracket.
- 3: Horizontal support plate or mounting bracket.
- 4: Small circular component, possibly a washer or spacer.
- 5: Small circular component, possibly a washer or spacer.
- 6: Small circular component, possibly a washer or spacer.
- 7: Small circular component, possibly a washer or spacer.
- 8: Small circular component, possibly a washer or spacer.
- 9: Small circular component, possibly a washer or spacer.
- 10: Small circular component, possibly a washer or spacer.
- 11: Small circular component, possibly a washer or spacer.
- 12: Small circular component, possibly a washer or spacer.
- 13: Small circular component, possibly a washer or spacer.
