NOTES:

INTRODUCTION

GENERAL

This parts book lists engine, chassis and mast service parts for the machine shown on the title page.

We reserve the right to make changes or add improvements at any time without incurring any obligation to install such changes on products previously sold.

ILLUSTRATIONS

Illustrated items are given item numbers which correspond to the same number in the parts list. Item numbers may point to more than one identical item. The quantity of items shipped will depend on the quantity ordered. Illustrations are of typical parts only and may not exactly match your application.

METHOD OF LISTING

The parts list and its associated illustration is the essential content of the Parts Book. Each parts list is arranged in numeric sequence by Chapter, Figure Number and by page number.

The parts list page is divided into five columns for easy use:

1. **ITEM Column** - This column contains keys to the illustration so the part can be located on the associated illustration. If there is no key number for the part, the part is not shown and is not on the associated illustration. In this case "NS" (Not Shown), or some other key, may appear in the column.
2. **PART NUMBER Column** - This column contains the part number of each serviceable part. The part number, in conjunction with the description of the part, is the key to locating needed service parts. If "*" appears, the part is "NSS" (Not Sold Separately).
3. **DESCRIPTION Column** - This column contains the description of each part. It can be used to find needed parts when the part number is not known. Indentation of an item, preceded by a dot (.), indicates that it is a component part (or subassembly) of the item shown above the item indented. There may be 2 or 3 dots in some cases.
4. **QTY Column** - This column contains the total quantity of each part number listed as needed for the product.
5. **SERIAL NO. Column** - This column contains the serial number range of each part number listed. The serial number is displayed in the page heading if it applies to all parts on that page.

PRODUCT GRAPHICS

The owner and/or operator must replace any and all safety and warning product graphics, plates or decals if they are defaced, illegible or missing from the machine, or have become inaccurate due to a change of equipment or attachments. This is an operational and a safety issue and is very important.

ABBREVIATIONS

The following abbreviations will be used in the parts listing:

AR - As Required	NSS - Not Serviced Separately
F1, F2, etc. - Footnote	L.H. - Left Hand
NS - Not Shown	R.H. - Right Hand
K - Kit	S/N - Serial Number
* - Part Not Available Separately	(--) - Part Shown for Reference Only
OP - Optional Parts	Forklift Model: S = Indoor / H = High Speed
O.S. - Oversize	

NOTE: Left and right sides of the machine are determined by sitting in the operator's seat and facing forward.

COMMON HARDWARE

Mounting hardware, including bolts, nuts, cotter pins and so forth, are illustrated in most cases.

ORDERING PARTS

When ordering parts, always give the following information:

1. The complete part number, including prefix or suffix letters, the name of the part and the quantity required.
2. The complete model number, machine serial number and engine serial number of the machine. See PRODUCT IDENTIFICATION NUMBERS, which follows.
3. When ordering parts for items which have their own serial numbers (such as transmissions, torque converters or axles) also include the serial numbers of the transmission, torque converter and/or axle. We recommend that you write the model and machine serial numbers of your machine and all major components in the spaces provided below.
