173-451	1.25	Hydraulic oil, changing
173-649	0.20	Hydraulic oil return filter, replacing

2 ENGINE WITH MOUNTING AND EQUIPMENT

20 GENERAL

200-068	1.50	E-ECU, MID 128, changing non-programmed ECU
200-070	0.80	E-ECU, MID 128, changing pre-programmed ECU

21 ENGINE

210-070	6.50	Engine, removing
210-072	7.00	Engine, installing
210-090	0.30	Camshaft and flywheel signals, checking with VCADS Pro and oscilloscope
211-002	7.00	Cylinder head, replacing gasket
214-012	2.50	Valves, adjusting
214-036	1.00	Valve covers, fitting new gasket

Op.no.	time (h)	Notes
216-014	7.50	Crankshaft, replacing front oil seal
216-018	8.50	Crankshaft, replacing rear oil seal
217-005	1.50	Oil level sensor, changing
22		LUBRICATING SYSTEM
221-022	0.50	Lubrication oil pressure, checking with pressure gauge
23		FUEL SYSTEM
230-001	0.50	Carbon dioxide in fuel system, check
233-001	0.30	Fuel system, bleeding
233-002	0.70	Feed pump, replacing
233-004	0.50	Feed pump, checking feed pressure
233-010	0.80	Fuel pump, inspection
233-014	0.40	Fuel filters, replacing
233-015	0.50	Fuel filter extra, replacing
233-020	0.10	Fuel filter, checking
234-010	4.00	Fuel tank, replacing
234-041	0.40	Fuel filling pump, removing
234-042	0.50	Fuel filling pump, installing
237-002	3.00	Injectors, replacing all
237-004	0.70	Injector, replacing one
237-033	0.80	Fuel control valve (FCV), replacing
237-037	0.70	Fuel rail pressure, checking
25		INLET SYSTEM; EXHAUST SYSTEM
252-020	1.25	Silencer, replacing
252-021	1.25	Exhaust pipe, flexible tube, replacing
255-002	0.80	Turbocharger, inspection
255-071	1.75	Turbocharger, replacing
256-001	0.25	Air cleaner, cleaning filter element
256-003	0.25	Air cleaner, primary filter replacing
256-004	0.25	Air cleaner, secondary filter replacing
256-006	0.40	Preheating coil, replacing
258-002	4.50	Intercooler, replacing
258-022	0.30	Charge air cooler connection (hose, tube), replacing
258-030	1.50	Charge air system, inspection
26		COOLING SYSTEM
261-002	0.10	Coolant, checking anti-freeze resistance
261-004	0.70	Coolant, changing
261-008	5.00	Radiator, replacing
261-012	0.50	Radiator hose upper, replacing
261-014	0.90	Radiator hoses lower, replacing
261-018	0.70	Expansion tank, replacing

Op.no.	time (h)	Notes
262-002	1.00	Coolant pump, replacing
262-098	1.00	Thermostat, replacing
263-012	0.90	Fan belt and/or alternator belt, replacing
263-013	0.50	Fan belt and/or alternator belt, checking and adjusting tension
263-022	0.90	Fan belt and/or alternator-, compressor belt, replacing all belts
3		ELEC. SYSTEM; WARNING SYSTEM; INFORMATION SYSTEM; INSTRUMENTS

173-101	0.40	Track motor gearbox, changing oil
173-401	0.60	Engine oil and filter, changing
173-412	0.20	Hydraulic oil tank breather filter, replacing
173-451	1.25	Hydraulic oil, changing
173-649	0.20	Hydraulic oil return filter, replacing

2 ENGINE WITH MOUNTING AND EQUIPMENT

20 GENERAL

200-068	1.50	E-ECU, MID 128, changing non-programmed ECU
200-070	0.80	E-ECU, MID 128, changing pre-programmed ECU

21 ENGINE

210-090	0.30	Camshaft and flywheel signals, checking with VCADS Pro and oscilloscope
214-012	2.50	Valves, adjusting

23 FUEL SYSTEM

230-001	0.50	Carbon dioxide in fuel system, check
233-001	0.30	Fuel system, bleeding
233-002	0.70	Feed pump, replacing
233-014	0.40	Fuel filters, replacing
233-015	0.50	Fuel filter extra, replacing
234-041	0.40	Fuel filling pump, removing
234-042	0.50	Fuel filling pump, installing
237-004	0.70	Injector, replacing one

Op.no.	time (h)	Notes
237-033	0.80	Fuel control valve (FCV), replacing
237-037	0.70	Fuel rail pressure, checking
25		INLET SYSTEM; EXHAUST SYSTEM
252-020	1.25	Silencer, replacing
252-021	1.25	Exhaust pipe, flexible tube, replacing
255-002	0.80	Turbocharger, inspection
255-071	1.75	Turbocharger, replacing
256-006	0.40	Preheating coil, replacing
258-002	4.50	Intercooler, replacing
258-022	0.30	Charge air cooler connection (hose, tube), replacing
26		COOLING SYSTEM
261-002	0.10	Coolant, checking anti-freeze resistance
261-004	0.70	Coolant, changing
261-008	5.00	Radiator, replacing
261-012	0.50	Radiator hose upper, replacing
261-014	0.90	Radiator hoses lower, replacing
261-018	0.70	Expansion tank, replacing
263-012	0.90	Fan belt and/or alternator belt, replacing
263-022	0.90	Fan belt and/or alternator-, compressor belt, replacing all belts
3		ELEC. SYSTEM; WARNING SYSTEM; INFORMATION SYSTEM; INSTRUMENTS
30		GENERAL
300-072	1.25	I-ECU, MID 140, changing non-programmed ECU
300-074	0.80	I-ECU, MID 140, changing pre-programmed ECU
31		BATTERY
311-001	0.80	Battery charging capacity, checking
311-002	0.90	Batteries, replacing
311-003	0.80	Main switch, replacing
311-006	0.60	Earth lead to battery, replacing
311-008	2.50	Starter motor lead to battery, replacing
32		ALTERNATOR; CHARGE REGULATOR
321-002	0.90	Alternator, replacing incl function check
321-075	0.50	Alternator, test
33		STARTING SYSTEM
331-018	0.70	Starter motor, replacing
331-021	0.30	Starter motor, tests

Op.no.	time (h)		Notes
331-081	0.30	Starter relay, replacing	
334-002	0.70	Starter switch, testing	
334-002	0.70	Starter switch, testing	
334-011	0.50	Starter switch (engine start switch), replacing	
35		LIGHTING	
356-056	0.50	Work lighting, replacing one head lamp assy	
36		OTHER ELECTRICAL EQUIPMENT	
362-002	0.30	Horn, replacing	
362-041	0.30	Rotating beacon, replacing	
362-051	0.50	Travel alarm, replacing	
363-003	0.40	Windscreen wiper, replacing switch	
363-004	0.50	Windscreen flusher pump, replacing	
363-091	0.50	Windscreen wiper, replacing controller	
364-003	0.60	Control lockout lever switch, replacing	
364-056	0.50	Pre-heating relay, replacing	
366-064	1.75	V-ECU, MID 187, changing non-programmed ECU	
366-066	1.25	V-ECU, MID 187, changing pre-programmed ECU	
367-075	0.90	Engine speed control switch, replacing	
38		INSTRUMENT; SENSOR; WARNING AND INFORMATION SYSTEM	
386-088	0.50	Engine rotation speed sensor (camshaft), replacing	
39		MISCELLANEOUS	
390-903	3.00	CareTrack standard cab, installing new	
390-904	3.00	CareTrack optional cab, installing new	
393-001	0.50	Voltage converter, replacing	
393-021	0.60	Radio, replacing	120513 - 320000 140011 - 340000
393-021	0.60	Radio, replacing	120001 - 120512 140001 - 140010
395-021	0.70	Antenna, replacing	
395-031	0.40	Speaker, replacing	
4		POWER TRANSMISSION	
43		GEARBOX,	
431-031	3.00	Pump gearbox coupling assembly, replacing	
431-117	1.25	Track gearbox, replacing cover	
431-127	6.00	Track unit, replacing	
44		HYDROSTATIC DRIVE	
441-021	3.00	Swing motor, replacing	

Op.no.	time (h)		Notes
441-022	0.70	Swing motor relief valve, replacing	
441-024	1.50	Swing motor, replacing plate (brake)	
441-025	1.25	Swing motor, replacing brake piston seal	
441-112	0.70	Track motor relief valve, replacing	
443-037	5.50	Center passage, replacing	
443-038	7.00	Center passage, replacing seal kit	
443-039	1.00	Center passage hose (valve – center passage), replacing	
443-040	1.50	Center passage hose (center passage – motor), replacing	
49		MISCELLANEOUS	
492-031	2.50	Swing ring gear outer seal, replacing	
492-091	0.50	Ring gear grease pipe, replacing	
7		FRAME; SPRINGS; DAMPING; AXLE SUSPENSION; WHEEL/TRACK UNIT	
71		FRAME

21 ENGINE

210-070	6.50	Engine, removing
210-072	7.00	Engine, installing
210-090	0.30	Camshaft and flywheel signals, checking with VCADS Pro and oscilloscope
211-002	7.00	Cylinder head, replacing gasket
214-012	2.50	Valves, adjusting
214-036	1.00	Valve covers, fitting new gasket

Op.no.	time (h)	Notes
216-014	7.50	Crankshaft, replacing front oil seal
216-018	8.50	Crankshaft, replacing rear oil seal
217-005	1.50	Oil level sensor, changing
22		LUBRICATING SYSTEM
221-022	0.50	Lubrication oil pressure, checking with pressure gauge
23		FUEL SYSTEM
230-001	0.50	Carbon dioxide in fuel system, check
233-001	0.30	Fuel system, bleeding
233-002	0.70	Feed pump, replacing
233-004	0.50	Feed pump, checking feed pressure
233-010	0.80	Fuel pump, inspection
233-014	0.40	Fuel filters, replacing
233-015	0.50	Fuel filter extra, replacing
233-020	0.10	Fuel filter, checking
234-010	4.00	Fuel tank, replacing
234-041	0.40	Fuel filling pump, removing
234-042	0.50	Fuel filling pump, installing
237-002	3.00	Injectors, replacing all
237-004	0.70	Injector, replacing one
237-033	0.80	Fuel control valve (FCV), replacing
237-037	0.70	Fuel rail pressure, checking
25		INLET SYSTEM; EXHAUST SYSTEM
252-020	1.25	Silencer, replacing
252-021	1.25	Exhaust pipe, flexible tube, replacing
255-002	0.80	Turbocharger, inspection
255-071	1.75	Turbocharger, replacing
256-001	0.25	Air cleaner, cleaning filter element
256-003	0.25	Air cleaner, primary filter replacing
256-004	0.25	Air cleaner, secondary filter replacing
256-006	0.40	Preheating coil, replacing
258-002	4.50	Intercooler, replacing
258-022	0.30	Charge air cooler connection (hose, tube), replacing
258-030	1.50	Charge air system, inspection
26		COOLING SYSTEM
261-002	0.10	Coolant, checking anti-freeze resistance
261-004	0.70	Coolant, changing
261-008	5.00	Radiator, replacing
261-012	0.50	Radiator hose upper, replacing
261-014	0.90	Radiator hoses lower, replacing
261-018	0.70	Expansion tank, replacing

Op.no.	time (h)	Notes
262-002	1.00	Coolant pump, replacing
262-098	1.00	Thermostat, replacing
263-012	0.90	Fan belt and/or alternator belt, replacing
263-013	0.50	Fan belt and/or alternator belt, checking and adjusting tension
263-022	0.90	Fan belt and/or alternator-, compressor belt, replacing all belts
3		ELEC. SYSTEM; WARNING SYSTEM; INFORMATION SYSTEM; INSTRUMENTS
30		GENERAL
300-072	1.25	I-ECU, MID 140, changing non-programmed ECU
300-074	0.80	I-ECU, MID 140, changing pre-programmed ECU
31		BATTERY
311-001	0.80	Battery charging capacity, checking
311-002	0.90	Batteries, replacing
311-003	0.80	Main switch, replacing
311-006	0.60	Earth lead to battery, replacing
311-008	2.50	Starter motor lead to battery, replacing

172-002	3.00	Warranty inspection 100 hours
173-007	3.00	Maintenance service, every 250 hours
173-010	3.00	Maintenance service, every 500 hours
173-014	4.00	Maintenance service, every 2000 hours
173-016	4.00	Maintenance service, every 3000 hours
173-059	0.50	Engine, changing oil and filter
173-075	0.75	Hydraulic oil tank, changing oil and filter incl.cleaning tank
173-081	0.50	Travel motor gearbox, changing oil
173-087	0.50	Coolant, changing
2		ENGINE WITH MOUNTING AND EQUIPMENT
21		ENGINE
210-070	2.50	Engine, removing
210-072	3.50	Engine, installing
210-073	3.50	Engine and transmission, removing
214-012	0.50	Valves, adjusting
218-001	3.00	Rubber cushion, replacing
22		LUBRICATING SYSTEM
222-011	0.25	Oil filter, replacing
23		FUEL SYSTEM
233-002	0.50	Feed pump, replacing
233-014	0.25	Fuel filters, replacing
233-041	0.25	Fuel strainer, changing
234-010	4.00	Fuel tank, replacing
236-073	2.00	Injection pump, replacing incl setting injection timing
237-002	0.50	Injectors, replacing all
237-019	0.50	Fuel line, leak-off pipe, replacing
25		INLET SYSTEM; EXHAUST SYSTEM
252-020	1.00	Silencer, replacing
252-021	0.50	Exhaust pipe, flexible tube, replacing

Op.no.	time (h)	Notes
26		COOLING SYSTEM
261-008	2.50	Radiator, replacing
261-012	0.50	Radiator hose upper, replacing
261-014	0.75	Radiator hoses lower, replacing
261-020	0.25	Expansion tank, removing
262-098	0.50	Thermostat, replacing
263-012	0.75	Fan belt and/or alternator belt, replacing
263-013	0.25	Fan belt and/or alternator belt, checking and adjusting tension
27		ENGINE CONTROL
272-010	1.50	Accelerator control cable, changing
273-021	0.25	Stop magnet, replacing
3		ELEC. SYSTEM; WARNING SYSTEM; INFORMATION SYSTEM; INSTRUMENTS
31		BATTERY
311-002	0.50	Batteries, replacing
32		ALTERNATOR; CHARGE REGULATOR
321-002	0.75	Alternator, replacing incl function check
33		STARTING SYSTEM
331-018	1.50	Starter motor, replacing
334-001	1.00	Starter lock, replacing
35		LIGHTING
352-008	0.25	Headlamp reflector and/or glass, replacing one incl adjusting
356-056	0.25	Work lighting, replacing one head lamp assy
36		OTHER ELECTRICAL EQUIPMENT
362-002	0.50	Horn, replacing
362-041	1.00	Rotating beacon, replacing
363-002	0.75	Windscreen wiper front, replacing motor
367-020	1.00	ECU, replacing
37		CABLE; FUSE; RELAY
371-041	0.75	Battery cable +, replacing
371-042	0.75	Cables, changing battery ground lead
371-044	0.50	Battery disconnecter, removal
372-011	0.75	Fuse box, changing
38		INSTRUMENT; SENSOR; WARNING AND INFORMATION SYSTEM
386-007	0.25	Engine oil pressure sensor, replacing

Op.no.	time (h)	Notes
386-011	0.75	Fuel level sender, replacing
4		POWER TRANSMISSION
43		GEARBOX,
431-021	8.00	Swing gearbox, replacing
44		HYDROSTATIC DRIVE
441-011	2.00	Travel motor, replacing one
441-012	0.50	Travel motor relief valve, replacing
441-021	2.50	Swing motor, replacing
441-024	1.50	Swing motor, replacing plate (brake)
441-026	4.00	Swing motor removed, replacing seal
443-013	5.00	Turning joint, replacing
7		FRAME; SPRINGS; DAMPING; AXLE SUSPENSION; WHEEL/TRACK UNIT
71		FRAME
716-003	1.00	Counterweight, replacing
77		WHEELS; TRACKS; TYRE; HUB; DRUM
775-011	2.00	Front idler, replacing one
775-022	1.50	Sprocket, removal
775-031	2.50	Track chain assembly, replacing (incl. shoe fitting)
775-052	2.00	Top roller, removal
775-062	0.50	Bottom roller, removing
775-071	0.75	Track guard, replacing one
8		MACHINERY HOUSE; CAB; EXTERIOR TRIM PARTS ANYWHERE
81		CAB, NAKED; CANOPY
810-001	2.00	Cab, removing
818-015	2.50	Cab suspension, rubber element replacing
82		ENGINE HOOD; MUDGUARD; FOOT STEP
821-005	1.00	Engine hood, replacing
821-006	0.25	Engine hood, removing (on site)
83		DOORS; HATCH; COVER PLATE, (all)
831-004	0.50	Door, replacing

Op.no.	time (h)	Notes
84		TRIM PART, OUTSIDE; GLASS; SEALING MOULDING
843-002	2.00	Windscreen, replacing
844-052	2.00	Sliding window, changing
85		CAB INTERIOR/UPHOLSTERY
852-003	0.25	Operator's seat, removing
87		AIR CONDITIONING UNIT
873-006	2.00	Fan motor, replacing
873-009	0.75	Heat control, replacing
873-097	1.50	Heater hose, replacing
88		INTERIOR EQUIPMENT
881-003	1.50	Instrument panel, replacing (left)
881-005	1.50	Instrument panel, replacing (right)
884-001	0.50	Seat safety belt, replacing
9		HYDRAULIC SYSTEM; DIGGING/ HANDLING/ GRADING EQUIPM.; MISC. EQUIP.
91		WORKING HYDRAULICS; SERVO HYDRAULICS
911-001	0.50	Oil return filter, replacing
911-005	1.00	Pump suction hose and pipe, replacing
911-011	1.00	Oil cooler, replacing
911-024	1.00	Pipe and hose (pump - valve), replacing
911-026	1.00	Pipe and hose (valve - swing motor), replacing
911-038	7.00	Hydraulic oil tank, replacing
911-051	0.25	Breather, replacing
912-001	5.00	Control valve, replacing
912-074	2.00	Rupture valve hose or pipe, replacing (boom cylinder)
912-075	2.00	Rupture valve hose or pipe, replacing (dipper arm cylinder)
913-007	4.50	Hydraulic pump (removed), changing shaft seal
913-010	3.50	Hydraulic pump, replacing
914-051	0.50	Accumulator, replacing
914-058	2.50	Servo valve, replacing
914-071	2.50	Servo pipe and hose, replacing
915-001	0.50	Servo valve, solenoid replacing

173-012	7.00	Maintenance service, every 1000 hours
173-014	10.00	Maintenance service, every 2000 hours
173-018	13.00	Maintenance service, every 4000 hours
173-022	11.00	Maintenance service, every 6000 hours
173-079	1.50	Swing motor gearbox, changing oil
173-101	0.50	Track motor gearbox, changing oil
173-401	0.60	Engine oil and filter, changing
173-412	0.20	Hydraulic oil tank breather filter, replacing
173-451	1.25	Hydraulic oil, changing
173-649	0.20	Hydraulic oil return filter, replacing

2 ENGINE WITH MOUNTING AND EQUIPMENT

20 GENERAL

200-068	1.75	E-ECU, MID 128, changing non-programmed ECU
200-070	1.25	E-ECU, MID 128, changing pre-programmed ECU

21 ENGINE

210-090	0.30	Camshaft and flywheel signals, checking with VCADS Pro and oscilloscope
214-012	3.50	Valves, adjusting
216-014	1.50	Crankshaft, replacing front oil seal
216-018	4.50	Crankshaft, replacing rear oil seal

23 FUEL SYSTEM

230-001	0.50	Carbon dioxide in fuel system, check
233-001	0.30	Fuel system, bleeding
233-002	1.75	Feed pump, replacing
233-004	0.20	Feed pump, checking feed pressure
233-010	2.00	Fuel pump, inspection
233-014	0.40	Fuel filters, replacing
233-015	0.50	Fuel filter extra, replacing
233-020	0.10	Fuel filter, checking
234-041	0.40	Fuel filling pump, removing

Op.no.	time (h)	Notes
234-042	0.50	Fuel filling pump, installing
237-012	6.00	Unit injector, replacing
25		INLET SYSTEM; EXHAUST SYSTEM
252-020	1.25	Silencer, replacing
252-021	1.25	Exhaust pipe, flexible tube, replacing
255-002	0.80	Turbocharger, inspection
255-071	4.00	Turbocharger, replacing
256-006	0.40	Preheating coil, replacing
258-002	7.00	Intercooler, replacing
258-022	0.40	Charge air cooler connection (hose, tube), replacing
258-030	1.75	Charge air system, inspection
26		COOLING SYSTEM
261-002	0.10	Coolant, checking anti-freeze resistance
261-004	0.70	Coolant, changing
261-008	7.50	Radiator, replacing
261-012	1.00	Radiator hose upper, replacing
261-014	1.25	Radiator hoses lower, replacing
261-018	0.80	Expansion tank, replacing
262-002	3.00	Coolant pump, replacing
262-098	1.50	Thermostat, replacing
263-012	0.60	Fan belt and/or alternator belt, replacing
263-022	1.25	Fan belt and/or alternator-, compressor belt, replacing all belts
3		ELEC. SYSTEM; WARNING SYSTEM; INFORMATION SYSTEM; INSTRUMENTS
30		GENERAL
300-072	1.25	I-ECU, MID 140, changing non-programmed ECU
300-074	0.80	I-ECU, MID 140, changing pre-programmed ECU
32		ALTERNATOR; CHARGE REGULATOR
321-075	0.50	Alternator, test
33		STARTING SYSTEM
331-021	0.30	Starter motor, tests
334-002	0.70	Starter switch, testing

911-031	1.00	Oil cooler line pipe and hose, replacing
911-033	1.50	Oil cooler line bypass valve (check valve), replacing
911-038	2.00	Hydraulic oil tank, replacing
911-043	0.25	Servo system filter, replacing
911-051	0.20	Breather, replacing
912-001	9.00	Control valve, replacing
912-067	1.50	Main pressure relief valve, replacing
912-071	0.70	Rupture valve, replacing (boom cylinder)
912-073	0.70	Rupture valve, replacing (dipper arm cylinder)
912-074	0.50	Rupture valve hose or pipe, replacing (boom cylinder)
912-075	0.50	Rupture valve hose or pipe, replacing (dipper arm cylinder)
913-007	0.30	Hydraulic pump (removed), changing shaft seal
913-010	4.00	Hydraulic pump, replacing
913-013	5.00	Hydraulic pump, replacing seal for input shaft
914-036	1.25	Servo pump block seal, replacing
914-051	0.30	Accumulator, replacing
914-060	1.00	Servo pump, replacing
914-071	0.50	Servo pipe and hose, replacing
914-081	1.00	Remote control valve (lever), replacing
914-084	2.00	Remote control valve (pedal), replacing
914-086	1.00	Remote control valve hose, replacing
914-091	1.00	Solenoid valve, replacing
916-044	0.50	Boom, replacing hose (boom cylinder)
916-045	0.75	Boom, replacing pipe (dipper arm cylinder)
916-046	0.50	Boom, replacing hose (dipper arm cylinder)
916-047	0.75	Boom, replacing pipe (bucket cylinder)
916-048	0.50	Dipper arm, replacing hose (bucket cylinder)
916-049	0.50	Dipper arm, replacing pipe (bucket cylinder)
916-091	0.50	Hammer and shear pipe, replacing (for boom)
916-092	0.50	Hammer and shear hose, replacing (for boom)
916-093	0.50	Hammer and shear pipe, replacing (for dipper arm)
916-094	0.50	Hammer and shear hose, replacing (for dipper arm)
916-095	0.50	Hammer and shear hose and pipe, replacing (MCV - 3 way valve)

Op.no.	time (h)	Notes
916-096	1.00	Hammer and shear pedal valve (RCV), replacing
92		MECHANICAL EQUIPMENT/ATTACHMENT
924-002	1.00	Quickfit valve, replacing
924-003	0.75	Quickfit solenoid valve, replacing
924-004	0.50	Quickfit control switch, replacing
924-041	0.50	Quickfit hydraulic hose, replacing (for boom)
924-042	0.50	Quickfit hydraulic pipe, replacing (for boom)
924-043	0.25	Quickfit hydraulic hose, replacing (for dipper arm)
924-044	0.50	Quickfit hydraulic pipe, replacing (for dipper arm)
924-045	0.50	Quickfit hydraulic cylinder hose, replacing (dipper arm cylinder)
925-011	0.75	Bucket assembly, replacing
925-012	0.20	Bucket assembly, removal
925-013	0.50	Bucket assembly, installation
97		UNIT, DIGGING
974-010	5.50	Boom, replacing
974-013	1.75	Boom, removal
974-014	4.00	Boom, installation
974-017	1.00	Boom, replacing pin
974-018	0.30	Boom grease pipe or hose, replacing
974-021	1.50	Boom cylinder, replacing
974-022	1.50	Boom cylinder removed, repacking
974-024	0.50	Boom cylinder removed, replacing bearings and/or bushes
974-025	1.50	Boom cylinder, repacking in machine
974-031	0.50	Boom cylinder, removal
974-032	0.90	Boom cylinder, installation
975-011	1.25	Dipper arm, removal
975-012	2.50	Dipper arm, installation
975-014	0.60	Dipper arm cylinder, removal
975-015	0.90	Dipper arm cylinder, installation
975-024	1.25	Dipper arm connecting rod, replacing
975-025	1.50	Dipper arm cylinder, replacing
975-026	1.50	Dipper arm cylinder removed, repacking
975-028	0.90	Connecting rod yoke, replacing
975-032	0.40	Connecting rod yoke, removal
975-035	0.60	Connecting rod yoke, installation
975-039	4.00	Dipper arm, replacing
975-043	1.50	Dipper arm cylinder, repacking in machine
975-044	0.50	Dipper arm cylinder removed, replacing bearings and/or bushes
975-061	1.50	Bucket cylinder, replacing
975-062	0.60	Bucket cylinder, removal

Op.no.	time (h)	Notes
975-063	1.50	Bucket cylinder, repacking in machine
975-065	0.80	Bucket cylinder, installation
975-069	1.50	Bucket cylinder removed, repacking
975-070	0.50	Bucket cylinder removed, replacing bushing

Op.no.	time (h)	Notes

1 STANDARD PARTS, SERVICE

17 SERVICE

170-005	0.25	Start of VCADS Pro computer and reading machine data
171-001	1.00	Arrival Inspection, according to Inspection Programme
171-002	3.00	Delivery Inspection, according to Inspection Programme
172-002	3.00	Warranty inspection 100 hours
172-004	11.00	Warranty inspection 1000 hours
173-002	1.00	Maintenance service, daily
173-004	1.50	Maintenance service, every 50 hours
173-007	2.50	Maintenance service, every 250 hours
173-010	4.50	Maintenance service, every 500 hours
173-012	7.00	Maintenance service, every 1000 hours
173-014	10.00	Maintenance service, every 2000 hours
173-018	13.00	Maintenance service, every 4000 hours
173-022	11.00	Maintenance service, every 6000 hours
173-079	1.25	Swing motor gearbox, changing oil
173-101	0.60	Track motor gearbox, changing oil
173-401	0.80	Engine oil and filter, changing
173-412	0.20	Hydraulic oil tank breather filter, replacing
173-451	1.50	Hydraulic oil, changing

2 ENGINE WITH MOUNTING AND EQUIPMENT

20 GENERAL

200-068	1.75	E-ECU, MID 128, changing non-programmed ECU
200-070	1.25	E-ECU, MID 128, changing pre-programmed ECU

21 ENGINE

210-070	7.50	Engine, removing
210-072	8.50	Engine, installing
210-076	17.00	Engine, replacing
210-090	0.30	Camshaft and flywheel signals, checking with VCADS Pro and oscilloscope
214-012	3.00	Valves, adjusting
214-036	1.50	Valve covers, fitting new gasket
216-014	4.00	Crankshaft, replacing front oil seal
216-018	12.00	Crankshaft, replacing rear oil seal
217-005	16.00	Oil level sensor, changing

Op.no.	time (h)	Notes
22		LUBRICATING SYSTEM
221-022	0.40	Lubrication oil pressure, checking with pressure gauge
23		FUEL SYSTEM
230-001	0.50	Carbon dioxide in fuel system, check
233-001	0.30	Fuel system, bleeding
233-002	1.75	Feed pump, replacing
233-004	0.40	Feed pump, checking feed pressure
233-010	1.50	Fuel pump, inspection
233-014	0.40	Fuel filters, replacing
233-015	0.50	Fuel filter extra, replacing
233-020	0.20	Fuel filter, checking
234-010	5.00	Fuel tank, replacing
234-041	0.40	Fuel filling pump, removing
234-042	0.50	Fuel filling pump, installing
237-012	5.50	Unit injector, replacing
25		INLET SYSTEM; EXHAUST SYSTEM
252-020	1.75	Silencer, replacing
252-021	1.50	Exhaust pipe, flexible tube, replacing
255-002	1.50	Turbocharger, inspection
255-071	4.50	Turbocharger, replacing
256-001	0.20	Air cleaner, cleaning filter element
256-003	0.20	Air cleaner, primary filter replacing
256-004	0.20	Air cleaner, secondary filter replacing
256-006	0.70	Preheating coil, replacing
258-002	5.00	Intercooler, replacing
258-022	0.70	Charge air cooler connection (hose, tube), replacing
258-030	2.00	Charge air system, inspection
26		COOLING SYSTEM
261-002	0.10	Coolant, checking anti-freeze resistance
261-004	0.70	Coolant, changing
261-008	5.50	Radiator, replacing
261-012	0.90	Radiator hose upper, replacing
261-014	1.50	Radiator hoses lower, replacing
261-018	0.90	Expansion tank, replacing
262-098	1.25	Thermostat, replacing
263-012	0.60	Fan belt and/or alternator belt, replacing
263-013	0.50	Fan belt and/or alternator belt, checking and adjusting tension
263-022	0.90	Fan belt and/or alternator-, compressor belt, replacing all belts

Op.no.	time (h)	Notes
3		ELEC. SYSTEM; WARNING SYSTEM; INFORMATION SYSTEM; INSTRUMENTS
30		GENERAL
300-072	1.25	I-ECU, MID 140, changing non-programmed ECU
300-074	0.80	I-ECU, MID 140, changing pre-programmed ECU
31		BATTERY
311-001	0.60	Battery charging capacity, checking
311-002	0.90	Batteries, replacing
311-003	0.70	Main switch, replacing
311-006	0.50	Earth lead to battery, replacing
311-008	2.50	Starter motor lead to battery, replacing
32		ALTERNATOR; CHARGE REGULATOR
321-002	1.00	Alternator, replacing incl function check
321-075	0.50	Alternator, test
33		STARTING SYSTEM
331-018	1.50	Starter motor, replacing
331-021	0.30	Starter motor, tests
331-081	0.40	Starter relay, replacing
334-002	0.70	Starter switch, testing
334-002	0.70	Starter switch, testing
334-011	0.50	Starter switch (engine start switch), replacing
35		LIGHTING
356-056	0.50	Work lighting, replacing one head lamp assy
36		OTHER ELECTRICAL EQUIPMENT
362-002	0.40	Horn, replacing
362-041	0.30	Rotating beacon, replacing
362-051	0.50	Travel alarm, replacing
363-003	0.40	Windscreen wiper, replacing switch
363-004	0.50	Windscreen flusher pump, replacing
363-091	0.50	Windscreen wiper, replacing controller
364-003	0.60	Control lockout lever switch, replacing
364-052	0.60	Battery relay, replacing
364-056	0.60	Pre-heating relay, replacing
366-064	1.75	V-ECU, MID 187, changing non-programmed ECU
366-066	1.25	V-ECU, MID 187, changing pre-programmed ECU
367-075	0.90	Engine speed control switch, replacing
38		INSTRUMENT; SENSOR; WARNING AND INFORMATION SYSTEM
386-006	0.50	Engine temperature sensor, replacing

Op.no.	time (h)		Notes
386-007	0.60	Engine oil pressure sensor, replacing	
386-011	0.30	Fuel level sender, replacing	
386-017	0.40	Hydraulic oil temperature sensor, replacing	
386-038	1.75	Engine rotation speed sensor, replacing	
386-043	0.50	Travel speed sensor or alarm sensor, replacing	
386-044	0.50	Auto idling sensor, replacing	
386-088	1.75	Engine rotation speed sensor (camshaft), replacing	
39		MISCELLANEOUS	
390-903	3.00	CareTrack standard cab, installing new	
390-904	3.00	CareTrack optional cab, installing new	
393-001	0.50	Voltage converter, replacing	
393-021	0.60	Radio, replacing	110001 - 110011
393-021	0.60	Radio, replacing	110012 - 310000
395-021	0.70	Antenna, replacing	
395-031	0.40	Speaker, replacing	
4		POWER TRANSMISSION	
43		GEARBOX,	
431-021	6.50	Swing gearbox, replacing	
431-026	1.75	Swing gearbox removed, replacing seal	
431-027	2.50	Swing gearbox removed, replacing shaft	
431-031	7.00	Pump gearbox coupling assembly, replacing	
431-036	7.00	Pump gearbox flange, replacing	
431-113	4.00	Track gearbox, removing	
431-114	3.50	Track gearbox, installing	
431-115	3.00	Track gearbox (removed), replacing floating seal	
431-117	1.75	Track gearbox, replacing cover	
431-127	7.00	Track unit, replacing	
44		HYDROSTATIC DRIVE	
441-017	1.25	Travel motor pressure, checking and adjusting	
441-021	3.50	Swing motor, replacing	
441-022	0.60	Swing motor relief valve, replacing	
441-024	1.50	Swing motor, replacing plate (brake)	
441-025	1.50	Swing motor, replacing brake piston seal	
441-026	1.00	Swing motor removed, replacing seal	
441-032	1.00	Swing motor pressure, checking and adjusting	
441-111	6.00	Track motor, replacing	
441-112	0.80	Track motor relief valve, replacing	
441-115	2.00	Track motor removed, replacing seal	
443-037	6.00	Center passage, replacing	

Op.no.	time (h)		Notes
443-038	7.50	Center passage, replacing seal kit	
443-039	1.50	Center passage hose (valve – center passage), replacing	
443-040	2.00	Center passage hose (center passage – motor), replacing	
49		MISCELLANEOUS	
492-031	3.00	Swing ring gear outer seal, replacing	
492-091	0.50	Ring gear grease pipe, replacing	
7		FRAME; SPRINGS; DAMPING; AXLE SUSPENSION; WHEEL/TRACK UNIT	
71		FRAME	
710-001	4.00	Superstructure, removing	
710-002	5.00	Superstructure, installing	
716-001	2.00	Counterweight, removing	110001 - 110110
716-003	4.00	Counterweight, replacing	
716-006	1.25	Removable counterweight, removing	
716-007	1.50	Removable counterweight, installing	
718-002	2.50	Retractable track, removing	
718-003	3.00	Retractable track, installing	
77		WHEELS; TRACKS; TYRE; HUB; DRUM	
775-011	4.50	Front idler, replacing one	
775-021	5.00	Sprocket, replacing one	
775-032	0.60	Track shoe, replacing one	
775-033	9.00	Track shoe, replacing each side	
775-034	1.50	Track chain assembly, removing	
775-035	2.50	Track chain assembly, installing	
775-036	11.00	Track links, replacing	
775-051	1.00	Top roller, replacing one	
775-061	1.25	Bottom roller, replacing one	
775-071	1.25	Track guard, replacing one	
775-080	4.00	Track tension cylinder, replacing	
775-081	4.50	Track recoil spring (tensioner) assembly, replacing	
8		MACHINERY HOUSE; CAB; EXTERIOR TRIM PARTS ANYWHERE	
81		CAB, NAKED; CANOPY	
810-001	1.75	Cab, removing	

Op.no.	time (h)	Notes
810-002	2.50	Cab, installing
82		ENGINE HOOD; MUDGUARD; FOOT STEP
821-005	1.00	Engine hood, replacing
827-091	1.25	Tool box assembly, replacing
83		DOORS; HATCH; COVER PLATE, (all)
831-004	0.75	Door, replacing
84		TRIM PART, OUTSIDE; GLASS; SEALING MOULDING
841-061	0.30	Rear-view mirror, changing
843-002	1.50	Windscreen, replacing
843-012	4.00	Rear window, replacing
843-013	4.50	Side window, replacing
843-048	0.70	Door window, replacing
85		CAB INTERIOR/UPHOLSTERY
852-008	1.25	Seat, replacing
852-091	2.50	Seat support, replacing
87		AIR CONDITIONING UNIT
870-001	5.00	Cooler and Heater assembly, replacing
872-001	0.50	Cab filter, replacing
873-004	3.00	Heater core, replacing
873-006	0.90	Fan motor, replacing
873-011	0.70	Air mix door actuator, replacing
873-019	0.90	ECC control unit, replacing
874-006	1.75	Compressor, replacing incl draining and filling
874-010	1.75	Condenser, replacing incl draining and filling
874-011	1.50	Receiver, replacing incl draining and filling
874-012	3.00	Evaporator, replacing incl draining and filling
874-013	3.00	Expansion valve, replacing incl draining and filling
874-094	0.60	Vent actuator, replacing
874-095	0.60	Mode (foot) actuator, replacing
874-096	0.60	Intake actuator, replacing
88		INTERIOR EQUIPMENT
881-003	1.00	Instrument panel, replacing (left)
881-005	1.25	Instrument panel, replacing (right)
9		HYDRAULIC SYSTEM; DIGGING/ HANDLING/ GRADING EQUIPM.; MISC. EQUIP.
91		WORKING HYDRAULICS; SERVO HYDRAULICS
911-005	3.00	Pump suction hose and pipe, replacing

Op.no.	time (h)	Notes
911-011	5.00	Oil cooler, replacing
911-015	0.50	Oil level gauge, replacing
911-017	2.00	Suction cover, replacing
911-024	1.25	Pipe and hose (pump - valve), replacing
911-025	1.00	Pipe and hose (valve - cylinder), replacing
911-026	0.75	Pipe and hose (valve - swing motor), replacing
911-031	1.50	Oil cooler line pipe and hose, replacing
911-032	1.25	Oil cooler line pipe coupling, replacing
911-033	2.00	Oil cooler line bypass valve (check valve), replacing
911-034	2.50	Oil cooler fan motor, replacing
911-038	5.00	Hydraulic oil tank, replacing
911-051	0.20	Breather, replacing
912-001	10.00	Control valve, replacing
912-067	0.75	Main pressure relief valve, replacing
912-070	1.00	Check valve, replacing
912-071	1.00	Rupture valve, replacing (boom cylinder)
912-073	1.50	Rupture valve, replacing (dipper arm cylinder)
913-004	1.25	Hydraulic pump, checking and adjusting max working pressure
913-007	0.30	Hydraulic pump (removed), changing shaft seal
913-010	6.00	Hydraulic pump, replacing
913-029	0.30	Pump regulator, replacing
914-036	1.50	Servo pump block seal, replacing
914-037	1.50	Servo pump shaft seal, replacing
914-041	0.80	Proportional solenoid valve (power shift), replacing
914-051	0.40	Accumulator, replacing
914-055	0.70	Servo pressure, checking and adjusting
914-060	1.50	Servo pump, replacing
914-081	1.75	Remote control valve (lever), replacing
914-084	1.75	Remote control valve (pedal), replacing
914-086	1.00	Remote control valve hose, replacing
914-091	1.00	Solenoid valve, replacing
916-096	1.00	Hammer and shear pedal valve (RCV), replacing
92		MECHANICAL EQUIPMENT/ATTACHMENT
924-001	1.50	Quickfit pump (gear pump), replacing
924-021	2.50	Quickfit hydraulic cylinder bracket (body), replacing
925-011	1.50	Bucket assembly, replacing
925-012	0.70	Bucket assembly, removal
925-013	1.00	Bucket assembly, installation

Op.no.	time (h)	Notes
97		UNIT, DIGGING
974-010	14.00	Boom, replacing
974-013	7.00	Boom, removal
974-014	7.00	Boom, installation
974-017	2.00	Boom, replacing pin
974-021	3.00	Boom cylinder, replacing
974-022	3.00	Boom cylinder removed, repacking
974-024	0.70	Boom cylinder removed, replacing bearings and/or bushes
974-025	6.00	Boom cylinder, repacking in machine
974-031	1.50	Boom cylinder, removal
974-032	1.50	Boom cylinder, installation
975-006	0.80	Dipper arm connecting rod, removal
975-007	0.80	Dipper arm connecting rod, installation
975-011	4.50	Dipper arm, removal
975-012	4.50	Dipper arm, installation
975-014	1.50	Dipper arm cylinder, removal
975-015	1.50	Dipper arm cylinder, installation
975-024	1.50	Dipper arm connecting rod, replacing
975-025	3.00	Dipper arm cylinder, replacing
975-026	3.50	Dipper arm cylinder removed, repacking
975-028	1.50	Connecting rod yoke, replacing
975-032	0.90	Connecting rod yoke, removal
975-035	0.80	Connecting rod yoke, installation
975-039	8.00	Dipper arm, replacing
975-044	0.50	Dipper arm cylinder removed, replacing bearings and/or bushes
975-061	2.50	Bucket cylinder, replacing
975-062	1.25	Bucket cylinder, removal
975-065	1.25	Bucket cylinder, installation

--------	----------	-------

1 STANDARD PARTS, SERVICE

17 SERVICE

170-005	0.25	Start of VCADS Pro computer and reading machine data
171-001	1.00	Arrival Inspection, according to Inspection Programme
171-002	3.00	Delivery Inspection, according to Inspection Programme
172-002	3.00	Warranty inspection 100 hours
172-004	8.00	Warranty inspection 1000 hours
173-002	0.90	Maintenance service, daily
173-004	1.50	Maintenance service, every 50 hours
173-007	2.50	Maintenance service, every 250 hours
173-010	4.50	Maintenance service, every 500 hours
173-012	7.00	Maintenance service, every 1000 hours
173-014	13.00	Maintenance service, every 2000 hours
173-018	13.00	Maintenance service, every 4000 hours
173-022	13.00	Maintenance service, every 6000 hours
173-079	1.50	Swing motor gearbox, changing oil
173-101	0.50	Track motor gearbox, changing oil
173-401	0.60	Engine oil and filter, changing
173-412	0.20	Hydraulic oil tank breather filter, replacing
173-451	1.25	Hydraulic oil, changing

2 ENGINE WITH MOUNTING AND EQUIPMENT

20 GENERAL

200-068	1.50	E-ECU, MID 128, changing non-programmed ECU
200-070	1.00	E-ECU, MID 128, changing pre-programmed ECU

21 ENGINE

210-090	0.30	Camshaft and flywheel signals, checking with VCADS Pro and oscilloscope
214-012	3.00	Valves, adjusting

23 FUEL SYSTEM

230-001	0.50	Carbon dioxide in fuel system, check
233-001	0.30	Fuel system, bleeding
233-002	0.90	Feed pump, replacing
233-004	0.50	Feed pump, checking feed pressure
233-010	1.25	Fuel pump, inspection
233-014	0.40	Fuel filters, replacing
233-015	0.50	Fuel filter extra, replacing

Op.no.	time (h)	Notes
233-020	0.20	Fuel filter, checking
234-041	0.40	Fuel filling pump, removing
234-042	0.40	Fuel filling pump, installing
235-003	0.40	Fuel return pressure, checking
237-004	0.70	Injector, replacing one
237-030	1.50	High pressure fuel pump, checking
237-033	0.80	Fuel control valve (FCV), replacing
237-035	0.50	Fuel rail pressure sensor, replacing
237-036	0.30	Pressure relief valve (PRV), checking
237-037	0.70	Fuel rail pressure, checking
26		COOLING SYSTEM
261-002	0.10	Coolant, checking anti-freeze resistance
261-004	0.70	Coolant, changing
261-018	1.25	Expansion tank, replacing
263-022	0.60	Fan belt and/or alternator-, compressor belt, replacing all belts
3		ELEC. SYSTEM; WARNING SYSTEM; INFORMATION SYSTEM; INSTRUMENTS
30		GENERAL
300-072	1.50	I-ECU, MID 140, changing non-programmed ECU
300-074	0.90	I-ECU, MID 140, changing pre-programmed ECU
31		BATTERY
311-001	0.30	Battery charging capacity, checking
311-002	0.90	Batteries, replacing
311-003	0.90	Main switch, replacing
32		ALTERNATOR; CHARGE REGULATOR
321-002	1.50	Alternator, replacing incl function check
321-075	0.50	Alternator, test
33		STARTING SYSTEM
331-018	1.75	Starter motor, replacing
331-021	0.30	Starter motor, tests
331-081	0.30	Starter relay, replacing
334-002	0.70	Starter switch, testing
334-002	0.70	Starter switch, testing
334-011	0.50	Starter switch (engine start switch), replacing
36		OTHER ELECTRICAL EQUIPMENT
362-002	0.30	Horn, replacing
362-002	0.30	Horn, replacing

Op.no.	time (h)	Notes
362-041	0.30	Rotating beacon, replacing
362-051	0.50	Travel alarm, replacing
363-002	1.00	Windscreen wiper front, replacing motor
363-004	0.50	Windscreen flusher pump, replacing
363-091	0.50	Windscreen wiper, replacing controller
364-003	0.60	Control lockout lever switch, replacing
366-064	1.50	V-ECU, MID 187, changing non-programmed ECU
366-066	0.90	V-ECU, MID 187, changing pre-programmed ECU
39		MISCELLANEOUS
390-903	3.00	CareTrack standard cab, installing new
390-904	3.00	CareTrack optional cab, installing new
393-001	0.50	Voltage converter, replacing
393-021	0.60	Radio, replacing
4		POWER TRANSMISSION
43		GEARBOX,
431-021	7.50	Swing gearbox, replacing
431-026	1.50	Swing gearbox removed, replacing seal
431-027	2.50	Swing gearbox removed, replacing shaft
431-031	4.50	Pump gearbox coupling assembly, replacing
431-036	5.50	Pump gearbox flange, replacing
431-053	6.50	Swing unit, replacing
431-115	2.50	Track gearbox (removed), replacing floating seal
431-117	1.50	Track gearbox, replacing cover
431-127	6.00	Track unit, replacing
44		HYDROSTATIC DRIVE
441-021	4.50	Swing motor, replacing
441-022	1.25	Swing motor relief valve, replacing
441-024	1.75	Swing motor, replacing plate (brake)
441-025	1.75	Swing motor, replacing brake piston seal
441-026	0.40	Swing motor removed, replacing seal
441-032	0.75	Swing motor pressure, checking and adjusting
441-112	0.70	Track motor relief valve, replacing
441-115	2.00	Track motor removed, replacing seal
443-037	7.00	Center passage, replacing
443-038	8.50	Center passage, replacing seal kit
443-039	1.50	Center passage hose (valve – center passage), replacing
443-040	1.50	Center passage hose (center passage – motor), replacing

Op.no.	time (h)		Notes
49		MISCELLANEOUS	
492-021	13.00	Swing ring gear, replacing	
492-031	3.00	Swing ring gear outer seal, replacing	110001 - 110312
492-031	3.00	Swing ring gear outer seal, replacing	110313 - 310000
492-032	9.00	Swing ring gear inner seal, replacing	110313 - 310000
492-032	12.00	Swing ring gear inner seal, replacing	110001 - 110312
492-091	0.40	Ring gear grease pipe, replacing	
492-091	0.50	Ring gear grease pipe, replacing	
7		FRAME; SPRINGS; DAMPING; AXLE SUSPENSION; WHEEL/TRACK UNIT	
71		FRAME	
710-001	6.50	Superstructure, removing	
710-002	8.50	Superstructure, installing	
716-001	1.50	Counterweight, removing	
716-002	1.50	Counterweight, fitting	
77		WHEELS; TRACKS; TYRE; HUB; DRUM	
775-011	3.00	Front idler, replacing one	
775-021	3.50	Sprocket, replacing one	
775-032	0.40	Track shoe, replacing one	
775-033	8.00	Track shoe, replacing each side	
775-034	1.25	Track chain assembly, removing	
775-035	1.75	Track chain assembly, installing	
775-036	11.00	Track links, replacing	
775-051	1.00	Top roller, replacing one	
775-061	1.50	Bottom roller, replacing one	
775-066	3.00	Bottom roller, replacing seal	
775-071	0.90	Track guard, replacing one	
775-081	3.00	Track recoil spring (tensioner) assembly, replacing	
8		MACHINERY HOUSE; CAB; EXTERIOR TRIM PARTS ANYWHERE	
81		CAB, NAKED; CANOPY	
810-001	1.50	Cab, removing	
810-002	2.00	Cab, installing	
84		TRIM PART, OUTSIDE; GLASS; SEALING MOULDING	
843-002	2.00	Windscreen, replacing	

Op.no.	time (h)	Notes
87		AIR CONDITIONING UNIT
870-003	1.75	Cooler and Heater assembly, removal
870-004	1.75	Cooler and Heater assembly, installation
872-001	0.50	Cab filter, replacing
873-004	4.00	Heater core, replacing
873-006	4.00	Fan motor, replacing
873-014	0.90	Water valve, replacing
873-019	0.40	ECC control unit, replacing
874-006	1.75	Compressor, replacing incl draining and filling
874-010	1.25	Condenser, replacing incl draining and filling
874-011	1.25	Receiver, replacing incl draining and filling
874-012	4.00	Evaporator, replacing incl draining and filling
874-013	1.75	Expansion valve, replacing incl draining and filling
874-021	0.60	Defroster actuator, replacing
874-094	0.40	Vent actuator, replacing
874-095	0.60	Mode (foot) actuator, replacing
874-096	0.40	Intake actuator, replacing
88		INTERIOR EQUIPMENT
881-003	1.00	Instrument panel, replacing (left)
881-005	1.25	Instrument panel, replacing (right)
9		HYDRAULIC SYSTEM; DIGGING/ HANDLING/ GRADING EQUIPM.; MISC. EQUIP.
91		WORKING HYDRAULICS; SERVO HYDRAULICS
911-005	2.00	Pump suction hose and pipe, replacing
911-011	5.00	Oil cooler, replacing
911-015	0.70	Oil level gauge, replacing
911-017	2.00	Suction cover, replacing
911-024	1.50	Pipe and hose (pump - valve), replacing
911-026	1.50	Pipe and hose (valve - swing motor), replacing
911-033	1.00	Oil cooler line bypass valve (check valve), replacing
911-034	5.00	Oil cooler fan motor, replacing
911-035	2.00	Oil cooler fan pump, replacing
911-038	4.00	Hydraulic oil tank, replacing
911-040	0.50	Hydraulic oil tank, vacuum-pumping, connecting and disconnecting pump
911-051	0.20	Breather, replacing
912-001	9.00	Control valve, replacing
912-067	0.70	Main pressure relief valve, replacing
912-070	0.90	Check valve, replacing

Op.no.	time (h)	Notes
912-071	1.00	Rupture valve, replacing (boom cylinder)
912-073	0.80	Rupture valve, replacing (dipper arm cylinder)
912-160	0.80	Port relief valve pressure, checking and adjusting
913-004	1.00	Hydraulic pump, checking and adjusting max working pressure
913-007	0.30	Hydraulic pump (removed), changing shaft seal
913-010	5.00	Hydraulic pump, replacing
913-029	0.70	Pump regulator, replacing
914-041	0.60	Proportional solenoid valve (power shift), replacing
914-051	0.30	Accumulator, replacing
914-060	0.80	Servo pump, replacing
914-081	1.75	Remote control valve (lever), replacing
914-084	1.75	Remote control valve (pedal), replacing
914-086	1.25	Remote control valve hose, replacing
914-091	1.50	Solenoid valve, replacing
916-096	0.80	Hammer and shear pedal valve (RCV), replacing
92		MECHANICAL EQUIPMENT/ATTACHMENT
925-011	1.25	Bucket assembly, replacing
925-012	0.50	Bucket assembly, removal
925-013	0.90	Bucket assembly, installation
97		UNIT, DIGGING
974-013	4.00	Boom, removal
974-014	4.50	Boom, installation
974-021	3.00	Boom cylinder, replacing
974-031	2.00	Boom cylinder, removal
974-032	1.00	Boom cylinder, installation
974-047	0.50	Adapter, removal
974-048	0.60	Adapter, installation
975-006	0.70	Dipper arm connecting rod, removal
975-007	0.70	Dipper arm connecting rod, installation
975-011	3.50	Dipper arm, removal
975-012	3.50	Dipper arm, installation
975-014	1.50	Dipper arm cylinder, removal
975-015	1.25	Dipper arm cylinder, installation
975-024	1.25	Dipper arm connecting rod, replacing
975-025	2.50	Dipper arm cylinder, replacing
975-028	1.50	Connecting rod yoke, replacing
975-032	0.70	Connecting rod yoke, removal
975-035	1.00	Connecting rod yoke, installation
975-039	9.00	Dipper arm, replacing
975-061	2.50	Bucket cylinder, replacing
975-062	1.50	Bucket cylinder, removal

Op.no.	time (h)	Notes
975-065	1.75	Bucket cylinder, installation
98		FUNCTION FOR ROAD CONSTRUCTION
981-081	0.70	Blade lift cylinder, removing
981-086	0.80	Blade lift cylinder, installing

Op.no.	time (h)		Notes

843-013	1.50	Side window, replacing
843-048	1.00	Door window, replacing
85		CAB INTERIOR/UPHOLSTERY
852-008	0.75	Seat, replacing
87		AIR CONDITIONING UNIT
872-001	0.50	Cab filter, replacing
872-011	1.00	Duct, replacing
872-021	1.00	Defroster hose, replacing
873-097	1.50	Heater hose, replacing
874-002	0.50	Refrigerant, draining
874-003	0.75	Cooling unit, performance test
874-005	1.00	Refrigerant, filling excl vacuum pumping
874-006	1.50	Compressor, replacing incl draining and filling
874-007	0.75	Belt, replacing
874-010	1.50	Condenser, replacing incl draining and filling
874-011	1.50	Receiver, replacing incl draining and filling
874-081	1.50	Liquid hose, replacing incl. draining and filling
874-082	1.25	Discharge hose, replacing incl. draining and filling
874-083	1.25	Suction hose, replacing incl. draining and filling
874-091	1.00	Switch and controller, replacing
9		HYDRAULIC SYSTEM; DIGGING/ HANDLING/ GRADING EQUIPM.; MISC. EQUIP.
91		WORKING HYDRAULICS; SERVO HYDRAULICS
911-001	0.20	Oil return filter, replacing
911-004	0.50	Suction strainer, replacing
911-005	1.75	Pump suction hose and pipe, replacing
911-011	2.00	Oil cooler, replacing
911-015	0.50	Oil level gauge, replacing
911-024	2.00	Pipe and hose (pump - valve), replacing
911-025	1.00	Pipe and hose (valve - cylinder), replacing
911-033	2.00	Oil cooler line bypass valve (check valve), replacing
911-038	2.50	Hydraulic oil tank, replacing
911-043	0.25	Servo system filter, replacing
912-001	10.00	Control valve, replacing

Op.no.	time (h)	Notes
912-067	1.00	Main pressure relief valve, replacing
912-071	0.70	Rupture valve, replacing (boom cylinder)
912-073	0.70	Rupture valve, replacing (dipper arm cylinder)
912-074	0.50	Rupture valve hose or pipe, replacing (boom cylinder)
912-075	0.50	Rupture valve hose or pipe, replacing (dipper arm cylinder)
913-007	0.30	Hydraulic pump (removed), changing shaft seal
913-010	4.00	Hydraulic pump, replacing
913-013	5.50	Hydraulic pump, replacing seal for input shaft
914-036	1.25	Servo pump block seal, replacing
914-051	0.30	Accumulator, replacing
914-060	0.80	Servo pump, replacing
914-071	0.50	Servo pipe and hose, replacing
914-081	1.75	Remote control valve (lever), replacing
914-084	2.00	Remote control valve (pedal), replacing
914-086	1.00	Remote control valve hose, replacing
914-091	1.00	Solenoid valve, replacing
914-099	2.50	Remote control valve (pedal), disassembly
914-100	2.00	Remote control valve (pedal), assembly
916-044	0.50	Boom, replacing hose (boom cylinder)
916-045	0.75	Boom, replacing pipe (dipper arm cylinder)
916-046	0.50	Boom, replacing hose (dipper arm cylinder)
916-047	0.75	Boom, replacing pipe (bucket cylinder)
916-048	0.50	Dipper arm, replacing hose (bucket cylinder)
916-049	0.50	Dipper arm, replacing pipe (bucket cylinder)
916-091	0.50	Hammer and shear pipe, replacing (for boom)
916-092	0.50	Hammer and shear hose, replacing (for boom)
916-093	0.50	Hammer and shear pipe, replacing (for dipper arm)
916-094	0.50	Hammer and shear hose, replacing (for dipper arm)
916-095	0.50	Hammer and shear hose and pipe, replacing (MCV - 3 way valve)
916-096	1.00	Hammer and shear pedal valve (RCV), replacing
92		MECHANICAL EQUIPMENT/ATTACHMENT
924-002	1.00	Quickfit valve, replacing
924-003	0.75	Quickfit solenoid valve, replacing
924-004	0.50	Quickfit control switch, replacing
924-041	0.50	Quickfit hydraulic hose, replacing (for boom)
924-042	0.50	Quickfit hydraulic pipe, replacing (for boom)
924-043	0.25	Quickfit hydraulic hose, replacing (for dipper arm)
924-044	0.50	Quickfit hydraulic pipe, replacing (for dipper arm)
924-045	0.50	Quickfit hydraulic cylinder hose, replacing (dipper arm cylinder)

Op.no.	time (h)	Notes
925-011	0.75	Bucket assembly, replacing

911-010	0.40	Cooling fan speed, checking and adjusting	
911-013	2.00	Hydraulic oil cooler, removing	
911-013	1.50	Hydraulic oil cooler, removing	122001 - 999999
911-014	2.00	Hydraulic oil cooler, installing	
911-014	1.75	Hydraulic oil cooler, installing	122001 - 999999
911-036	1.25	Hydraulic oil tank, removing	
911-037	2.50	Hydraulic oil tank, installing	
911-044	0.90	Oil cooler fan motor, removal	
911-045	1.25	Oil cooler fan motor, installation	
911-046	0.80	Cooling fan pump, removal	
911-047	1.50	Cooling fan pump, installation	
912-018	1.25	Back-up valve, checking and adjusting	122501 - 999999
912-018	1.25	Back-up valve, checking and adjusting	120010 - 122499
912-019	0.40	Shock valve removed, checking	
912-071	1.00	Rupture valve, replacing (boom cylinder)	122139 - 999999
912-073	0.70	Rupture valve, replacing (dipper arm cylinder)	
912-091	3.00	Main control valve, removal	
912-092	4.00	Main control valve, installation	
912-117	1.50	LS-pressure relief valve, replacing	120010 - 120777
912-117	1.50	LS-pressure relief valve, replacing	122001 - 999999
912-117	0.80	LS-pressure relief valve, replacing	122501 - 999999
912-118	1.00	Safety relief valve, replacing	
912-118	1.00	Safety relief valve, replacing	122001 - 999999
912-150	1.25	Working pressure, checking and adjusting	
912-162	1.00	Line rupture valve pressure, checking and adjusting	
912-169	0.60	Unload valve, checking and adjusting	122139 - 999999
912-169	0.60	Unload valve, checking and adjusting	122139 - 999999
912-170	1.00	Unload valve, replacing	122139 - 999999
912-170	1.00	Unload valve, replacing	122139 - 999999
912-210	0.70	Rupture valve, replacing (2pcs boom tilt cylinder)	
913-003	0.30	Hydraulic pump, checking and adjusting standby pressure	120010 - 122138
913-007	0.30	Hydraulic pump (removed), changing shaft seal	
913-023	2.00	Pump, removal	
913-024	3.50	Pump, installation	
914-031	0.60	Servo pump, removal	
914-032	0.50	Servo pump, installation	
914-055	0.30	Servo pressure, checking and adjusting	
914-064	0.60	Servo valve, removal	122094 - 999999
914-064	0.60	Servo valve, removal	120010 - 122093

Op.no.	time (h)		Notes
914-065	0.70	Servo valve, installation	122094 - 999999
914-065	0.70	Servo valve, installation	
914-103	0.20	Control lockout lever, function check	
915-004	3.50	Control lever, removal	
915-005	3.50	Control lever, installation	
916-059	0.70	Calibration of cruise control	
916-060	1.00	Calibration of X1 hydraulic with flow control	
916-061	0.50	Calibration of X1 hydraulic with pressure control	
916-062	0.90	X1 pressure relief valve, adjusting	
916-062	1.25	X1 pressure relief valve, adjusting	
916-110	0.90	X3 pressure and flow, adjusting	
916-111	0.90	X3 shock and refilling valves, adjusting

23		FUEL SYSTEM
230-001	0.50	Carbon dioxide in fuel system, check
233-001	0.30	Fuel system, bleeding

Op.no.	time (h)	Notes
233-004	0.30	Feed pump, checking feed pressure
233-008	1.00	Fuel pump, replacing
236-002	0.50	Stall speed, checking
237-002	3.50	Injectors, replacing all
237-017	11.00	Injector sleeves, replacing
237-032	2.00	High pressure fuel pump, replacing
237-033	1.50	Fuel control valve (FCV), replacing
237-034	3.00	Pressure relief valve (PRV), replacing
237-035	0.30	Fuel rail pressure sensor, replacing
237-124	0.70	High pressure fuel system, pressure relief
25		INLET SYSTEM; EXHAUST SYSTEM
252-021	1.25	Exhaust pipe, flexible tube, replacing
254-001	2.00	Diesel particulate filter, check and clean
254-022	1.50	ACM (After treatment control module), replacing, non-programmed
254-023	1.25	ACM (After treatment control module), replacing, pre-programmed
254-031	0.90	Air pump, replacing
254-033	1.50	Burner, replacing
254-043	0.30	Spark plug control unit, replacing
254-044	0.20	Glow plug, replacing
254-046	0.20	Spark plug, replacing
254-047	0.20	Spark plug, checking
254-048	0.20	Spark plug cable, replacing
254-049	0.40	Throttle, replacing
254-050	1.25	Fuel metering unit A, replacing
254-051	2.50	Fuel metering unit B, replacing
254-052	0.50	Air pump safety valve, replacing
254-053	0.80	Glow plug control unit, replacing
254-055	1.25	DPF bracket, replacing
254-056	0.40	NOx sensor, replacing
254-060	2.00	Diesel oxidation catalyst, replacing
254-066	0.40	Exhaust Aftertreatment System, T-junction, replacing
255-009	0.50	Waste gate, testing
255-070	0.70	Turbocharger, removing
255-072	1.75	Turbocharger, installing
256-006	1.25	Preheating coil, replacing
258-002	4.00	Intercooler, replacing
26		COOLING SYSTEM
260-001	0.70	Carbon dioxide in coolant system, checking
260-003	0.60	Cooling system, pressure control
261-011	1.25	Radiator, removing

Op.no.	time (h)	Notes
261-013	1.75	Radiator, installing
262-002	0.90	Coolant pump, replacing
262-098	1.00	Thermostat, replacing
263-072	0.20	Fan control valve, seal replacement
263-081	0.60	Hydraulic pump P3, removal
263-082	1.25	Hydraulic pump P3, installation
29		Miscellaneous
293-001	3.00	EGR cooler, replacing
293-004	3.00	EGR cooler, cleaning
293-005	3.00	EGR valve, replacing
293-006	0.20	EGR temperature sensor, replacing
293-007	0.20	EGR pressure sensor, replacing
293-008	1.25	EGR Actuator, replacing
293-010	0.40	EGR Venturi tube, replacing
293-011	0.40	EGR reed valve, checking
3		ELEC. SYSTEM; WARNING SYSTEM; INFORMATION SYSTEM; INSTRUMENTS
30		GENERAL
300-072	0.80	I-ECU, MID 140, changing non-programmed ECU
300-074	0.30	I-ECU, MID 140, changing pre-programmed ECU
31		BATTERY
311-002	0.30	Batteries, replacing
311-005	0.40	Battery condition, check
32		ALTERNATOR; CHARGE REGULATOR
321-003	0.40	Alternator, removing
321-004	0.40	Alternator, installing
36		OTHER ELECTRICAL EQUIPMENT
366-064	1.50	V-ECU, MID 187, changing non-programmed ECU
366-066	0.70	V-ECU, MID 187, changing pre-programmed ECU
39		MISCELLANEOUS
398-004	0.70	CareTrack battery, replacing
4		POWER TRANSMISSION
42		TRANSMISSION, HYDRAULIC CONTROL
421-002	0.80	Transmission oil pressure, checking

Op.no.	time (h)	Notes
421-002	0.90	Transmission oil pressure, checking
421-048	1.25	Gear selector valve, replacing one solenoid
421-052	2.00	Seal for front output shaft, replacing
421-054	1.75	Seal for rear output shaft, replacing
421-070	7.00	Transmission, removing
421-072	11.00	Transmission, installing
421-091	1.50	Lock up valve, replacing
421-099	0.70	Transmission, calibration
421-100	0.20	Transmission, function check
421-100	0.30	Transmission, function check
46		FRONT AXLE; REAR AXLE
461-037	1.00	Hub reduction, removing
461-038	1.25	Hub reduction, installing
461-043	4.50	Hub, replacing seal
463-002	3.00	Axle, removing
463-003	2.50	Axle, installing
463-037	5.50	Axle suspension, replacing bushes and seals
463-043	4.50	Hub, replacing seal
463-045	1.00	Hub reduction, removing
463-046	1.25	Hub reduction, installing
468-006	0.20	Differential lock, function check
468-051	1.25	Differential lock, adjusting
5		BRAKE
51		WHEEL BRAKE
510-003	0.40	Brake discs, measuring wear
510-004	0.10	Wheel brakes, functional check
516-005	3.00	Brake disc, replacing
516-050	2.50	Brake piston, replacing seals
517-005	3.00	Brake disc, replacing
517-050	2.50	Brake piston, replacing seals
52		HYDRAULIC BRAKE SYSTEM
520-002	0.20	Brake system, checking function, retardation
520-005	0.30	Brake system, check and adjusting pressure in circuit
520-036	0.80	Brake system charging, checking
520-037	0.30	Brake system, bleeding
520-037	0.30	Brake system, bleeding
520-111	0.20	Automatic brake, function check
527-001	0.10	Accumulator removed, checking charging pressure

Op.no.	time (h)	Notes
527-003	0.50	Accumulators, checking in machine
527-012	0.40	Accumulator, removal
527-013	0.40	Accumulator, installation
55		PARKING BRAKE
550-006	4.00	Parking brake, replacing discs and seals
550-023	0.10	Parking brake, function checking
6		STEERING
60		GENERAL
600-001	0.50	Steering system, function check
64		STEERING
645-011	2.50	Left steering cylinder, removal
645-012	2.50	Left steering cylinder, installation
645-013	2.50	Right steering cylinder, removal
645-014	1.75	Right steering cylinder, installation
645-028	0.40	Steering system, checking and adjusting working pressure
645-055	2.00	Left steering cylinder, replacing bearings
645-056	1.25	Right steering cylinder, replacing bearings
645-063	0.60	Steering cylinder, repacking
645-077	0.90	Steering cylinder removed, reconditioning incl replacing bearings
647-091	0.70	Secondary steering pump, checking and adjusting working pressure
66		LEVER STEERING
660-006	0.90	Comfort drive control (CDC), angle sensor, changing
660-007	1.25	Comfort drive control (CDC), solenoid valve, changing
660-011	0.20	Lever steering (CDC), functional check
660-012	0.40	Comfort Drive Control, servo pressure, checking
660-013	0.90	Comfort Drive Control (CDC), joystick, changing
7		FRAME; SPRINGS; DAMPING; AXLE SUSPENSION; WHEEL/TRACK UNIT
71		FRAME
716-001	1.50	Counterweight, removing
716-002	1.25	Counterweight, fitting

Op.no.	time (h)	Notes
74		FRAME LINK
741-036	19.00	Frame joint, replacing bearings
77		WHEELS; TRACKS; TYRE; HUB; DRUM
771-002	0.50	Front wheel, removal
771-003	0.30	Front wheel, installation
771-004	0.50	Rear wheel, removing
771-005	0.30	Rear wheel, installing
8		MACHINERY HOUSE; CAB; EXTERIOR TRIM PARTS ANYWHERE
81		CAB, NAKED; CANOPY
810-001	3.50	Cab, removing
810-002	4.00	Cab, installing
82		ENGINE HOOD; MUDGUARD; FOOT STEP
821-001	0.60	Engine hood, removing
821-002	1.00	Engine hood, installing
821-010	0.60	Actuator, replacing
821-012	0.20	Engine hood, manually operating
83		DOORS; HATCH; COVER PLATE, (all)
831-054	0.30	Electric door opener, control unit, replacing
831-055	0.30	Electric door opener, locking motor, replacing
831-056	0.20	Electric door opener, rotor switch, replacing
831-057	0.30	Electric door opener, opening support motor, replacing
834-013	0.30	Door lock cylinder, replacing
84		TRIM PART, OUTSIDE; GLASS; SEALING MOULDING
843-002	2.50	Windscreen, replacing
85		CAB INTERIOR/UPHOLSTERY
852-010	0.40	Operator's seat, securing
87		AIR CONDITIONING UNIT
870-010	0.50	ECC, MID 146, changing pre-programmed ECU
870-011	0.80	ECC, MID 146, changing non-programmed ECU
870-012	0.90	Climate unit, removing
870-013	1.25	Climate unit, installing
870-014	0.90	Pause heater, replacing
873-004	2.50	Heater core, replacing
873-006	2.50	Fan motor, replacing
873-008	1.25	Heat control valve, replacing

Op.no.	time (h)	Notes
873-011	0.80	Air mix door actuator, replacing
874-001	1.75	Refrigerant, filling incl vacuum pumping
874-002	0.80	Refrigerant, draining
874-012	3.00	Evaporator, replacing incl draining and filling
874-024	3.00	Evaporator, replacing
874-025	4.00	Expansion valve, replacing
9		HYDRAULIC SYSTEM; DIGGING/ HANDLING/ GRADING EQUIPM.; MISC. EQUIP.
90		GENERAL
900-001	0.50	Hydraulic system, warming up
900-002	3.00	Hydraulic system, bleeding
91		WORKING HYDRAULICS; SERVO HYDRAULICS
911-040	0.20	Hydraulic oil tank, vacuum-pumping, connecting and disconnecting pump
912-018	0.20	Back-up valve, checking and adjusting
912-021	0.60	Shock valve, tilt function, checking
912-023	0.60	Shock valve lift function, checking
912-121	0.90	Lift, solenoid valve, changing
912-122	0.70	Lower, solenoid valve, changing
912-123	1.00	Tilt in, solenoid valve, changing
912-124	0.90	Tilt out, solenoid valve, changing
912-125	0.70	Lift/lower, angle sensor, changing
912-126	2.00	Tilt in/out, angle sensor, changing
912-127	0.20	Tilt, functional check
912-151	0.30	Back-up valve, replacing
912-226	0.20	Lift/lower function, checking
913-001	0.60	Hydraulic pump, checking and adjusting standby pressure and working pressure
913-034	0.20	Lifting time, checking
913-050	1.25	Hydraulic pump P2, removal
913-051	2.50	Hydraulic pump P2, installation
913-059	0.70	Hydraulic pump P3, checking function
913-060	1.00	Hydraulic pump P1, removal
913-061	2.00	Hydraulic pump P1, installation
914-047	0.20	Servo accumulator, removal
914-047	0.20	Servo accumulator, removal
914-048	0.10	Servo accumulator, installation
914-048	0.10	Servo accumulator, installation
914-049	0.40	Accumulator removed, checking
914-055	0.20	Servo pressure, checking and adjusting

Op.no.	time (h)		Notes
914-063	0.60	Servo pressure, checking at the spool in control valve	
914-905	0.90	Single lever control electric servo, replacing	
916-001	0.30	Boom suspension system, functional check	
916-003	0.60	Boom suspension accumulator, reconditioning	
916-006	0.60	Boom suspension system, pressure reduction, safety valve, checking and adjusting	
916-008	0.70	Boom suspension system, right accumulator, removal	1000 - 30461
916-008	1.00	Boom suspension system, right accumulator, removal	30462 - 99999
916-009	1.25	Boom suspension system, right accumulator, installation	1000 - 30461
916-009	1.50	Boom suspension system, right accumulator, installation	30462 - 99999
916-010	1.00	Boom suspension system, left accumulator, removal	30462 - 99999
916-010	0.60	Boom suspension system, left accumulator, removal	1000 - 30461
916-011	1.50	Boom suspension system, left accumulator, installation	30462 - 99999
916-011	1.25	Boom suspension system, left accumulator, installation	1000 - 30461
916-017	0.50	3rd/4th hydraulic function, shock valve, checking	
916-018	0.60	3rd/4th hydraulic function, solenoid valve, changing	
916-020	0.20	3rd/4th hydraulic function, checking and adjusting pressure	
916-070	0.30	Boom suspension system, hydraulic oil pressure in accumulators, depressurizing	
916-072	0.20	Accumulator, boom suspension system, discarding	
92		MECHANICAL EQUIPMENT/ATTACHMENT	
924-036	0.10	Attachment locking, functional check

210-070	4.00	Engine, removing
210-072	5.00	Engine, installing
218-007	1.00	Engine mounting rear, changing
23		FUEL SYSTEM
233-001	0.20	Fuel system, bleeding
233-014	0.40	Fuel filters, replacing
234-010	5.50	Fuel tank, replacing
235-002	0.20	Fuel line, water separator, check and drain
25		INLET SYSTEM; EXHAUST SYSTEM
252-020	1.25	Silencer, replacing
252-022	2.50	Exhaust pipe, changing pipe between silencer and turbocharger
256-011	1.25	Air cleaner, installing
258-022	0.50	Charge air cooler connection (hose, tube), replacing
258-023	0.40	Charge air cooler, removing
258-024	0.40	Charge air cooler, installing
26		COOLING SYSTEM
263-012	0.80	Fan belt and/or alternator belt, replacing
263-013	0.40	Fan belt and/or alternator belt, checking and adjusting tension
263-041	4.00	Cooling fan, replacing
263-042	4.00	Fan shroud, replacing
3		ELEC. SYSTEM; WARNING SYSTEM; INFORMATION SYSTEM; INSTRUMENTS
31		BATTERY
311-002	1.25	Batteries, replacing

Op.no.	time (h)	Notes
32		ALTERNATOR; CHARGE REGULATOR
321-002	2.50	Alternator, replacing incl function check
33		STARTING SYSTEM
331-018	0.50	Starter motor, replacing
334-011	0.70	Starter switch (engine start switch), replacing
36		OTHER ELECTRICAL EQUIPMENT
362-003	0.40	Reverse alarm, replacing
363-001	0.60	Windscreen wiper rear, replacing motor
363-002	0.60	Windscreen wiper front, replacing motor
364-004	0.30	Switch, replacing
38		INSTRUMENT; SENSOR; WARNING AND INFORMATION SYSTEM
386-007	0.30	Engine oil pressure sensor, replacing
386-011	1.75	Fuel level sender, replacing
386-017	0.60	Hydraulic oil temperature sensor, replacing
4		POWER TRANSMISSION
42		TRANSMISSION, HYDRAULIC CONTROL
421-088	4.00	Two speed valve solenoid and cartridge, replacing
421-089	1.25	Pump de-stroke valve solenoid and cartridge, replacing
424-004	2.50	Propulsion control lever, replacing
44		HYDROSTATIC DRIVE
440-021	1.25	Hydrostatic controller, removing
440-022	1.50	Hydrostatic controller, installing
441-011	4.00	Travel motor, replacing one
441-035	5.00	Drive motor, removing
441-036	5.00	Drive motor, installing
441-061	1.75	Thermal bypass valve, replacing
442-021	3.50	Hydrostatic pump, removing
442-022	4.50	Hydrostatic pump, installing
442-045	4.00	Pump coupling, removing
442-046	5.00	Pump coupling, installing
442-068	0.50	Loop flushing valve, replacing
442-069	1.00	Loop flushing valve cartridge, replacing
442-080	0.40	Drum drive motor speed sensor, replacing
442-081	0.40	Rear axle motor speed sensor, replacing
442-090	0.40	Vibration speed sensor, replacing
442-091	1.50	Traction valve, solenoid and cartridge, replacing

Op.no.	time (h)	Notes
46		FRONT AXLE; REAR AXLE
463-002	5.00	Axle, removing
463-003	5.00	Axle, installing
5		BRAKE
55		PARKING BRAKE
551-012	0.50	Parking brake pressure switch, replacing
6		STEERING
64		STEERING
641-021	4.50	Adjustable steering column, replacing
645-004	1.50	Steering cylinder, removing
645-005	1.75	Steering cylinder, installing
645-031	2.00	Steering control unit, removing
645-035	2.50	Steering control unit, installing
7		FRAME; SPRINGS; DAMPING; AXLE SUSPENSION; WHEEL/TRACK UNIT
74		FRAME LINK
741-022	5.00	Frame joint, Replacing the front pivot bearing with machine separated
741-023	6.00	Frame joint, replacing the rear pivot bearing with machine separated
77		WHEELS; TRACKS; TYRE; HUB; DRUM
771-001	0.80	Wheel, removing and fitting one
777-001	13.00	Drum, removing
777-002	13.00	Drum, installing
777-003	3.00	Vibration pump, removing
777-004	3.50	Vibration pump, installing
777-005	0.90	Vibration motor, removing
777-006	1.00	Vibration motor, installing
777-007	12.00	Eccentric weight, removing
777-008	13.00	Eccentric weight, installing
777-009	2.00	Drum shock mount, replacing
777-010	25.00	Eccentric shaft coupling, replacing
777-011	3.50	Torque hub, removing
777-012	3.50	Torque hub, installing
777-013	25.00	Eccentric weight bearings, replacing

Op.no.	time (h)	Notes
777-014	6.00	Carrier bearings, replacing
777-015	9.00	Eccentric weight, overhaul
777-020	5.00	Drum bolt-on shell option, installing
777-021	1.25	Smooth drum scrapers, replacing
777-022	1.25	Padfoot drum scrapers, replacing
8		MACHINERY HOUSE; CAB; EXTERIOR TRIM PARTS ANYWHERE
81		CAB, NAKED; CANOPY
818-023	2.50	Viscous cab suspension, changing all units
82		ENGINE HOOD; MUDGUARD; FOOT STEP
821-001	2.50	Engine hood, removing
821-002	2.50	Engine hood, installing
821-030	2.50	Engine hood, changing spring
85		CAB INTERIOR/UPHOLSTERY
852-003	0.90	Operator's seat, removing
852-004	1.00	Operator's seat, installing
87		AIR CONDITIONING UNIT
870-003	1.75	Cooler and Heater assembly, removal
870-004	5.00	Cooler and Heater assembly, installation
872-001	0.60	Cab filter, replacing
873-004	10.00	Heater core, replacing
873-006	6.50	Fan motor, replacing
873-008	2.50	Heat control valve, replacing
873-013	2.50	Heater unit relays, replacing
874-006	3.00	Compressor, replacing incl draining and filling
874-010	3.00	Condenser, replacing incl draining and filling
874-011	3.00	Receiver, replacing incl draining and filling
874-012	7.50	Evaporator, replacing incl draining and filling
874-014	7.50	Thermostat, replacing
874-016	0.30	Compressor, replacing magnetic clutch (compressor removed)
874-092	0.30	HVAC control switch, replacing
88		INTERIOR EQUIPMENT
884-001	0.40	Seat safety belt, replacing

Op.no.	time (h)	Notes
9		HYDRAULIC SYSTEM; DIGGING/ HANDLING/ GRADING EQUIPM.; MISC. EQUIP.

91457	0,5	Servo pressure, check
91458	3	Servo valve, replacing
91460	2	Servo pump, replacing
91462	0,5	Pressure limiting valve, replacing
91463	0,5	Servo pressure, checking by spool valve in control valve
91475	2	Servo valve removed, reconditioning
91601	0,5	Boom suspension system, checking function
91602	0,75	Accumulator, check and adjusting
91603	1	Accumulator, reconditioning
91604	1,5	Boom suspension system, checking closing pressure
91605	1	Boom suspension system, checking opening pressure

94 Unit for load handling

94502	3,5	Lift frame, replacing bearing in lower bucket- or implement attachment
94503	0,25	Implement attachment, measuring clearance of lower bearing
94504	4	Lift cylinder, replacing
94505	4	Lift cylinder, repacking in machine
94506	3	Lift cylinder removed, repacking
94508	3	Tilt cylinder, replacing
94509	5	Tilt cylinder, repacking in machine
94510	3,5	Tilt cylinder removed, repacking
94511	2	Implemental attachment, replacing hydraulic cylinder
94516	5	Lift frame, replacing bearing in upper mounting "O"
94554	1,75	Implement attachment, replacing
94556	1	Implement attachment, repacking removed hydraulic cylinder
94562	2	T-link upper, replacing "HIJ"
94563	0,75	T-link upper removed, replacing bearings

	https://truckmanualshub.com/	"HIJ"
94564	2	T-link, lower, replacing "IB"
94566	2	Tilt link, replacing "GH"
94567	0,75	Tilt link removed, replacing bearings "GH"
94568	3	Tilt arm, replacing bearing "GDF"
94569	3	Tilt arm, replacing "GDF"

WARNING

Before any action is taken when preparing for towing or recovering, the parking brake must be applied and the wheels must be blocked to prevent the machine from rolling. Work with extreme care when towing/recovering in order to avoid personal injuries and, at worst, fatalities.

Measures for towing/recovering

If possible, the engine should be started for towing/recovering in order for the brake and steering functions to operate in a satisfactory manner.

WARNING

If the engine cannot be started:

Since brake and steering functions will be limited when the engine is not running, the machine may only be towed in an emergency and only the shortest possible distance under the supervision of trained personnel. If possible, transport the machine on a trailer. In order to release the parking brake, see manual release of parking brake for respective machine types.

Recovering

Use a towbar for towing the machine to a suitable location or passable road. The towbar must be connected directly to the towing device at the rear of the machine.

NOTE!

The lifting eyes must not be used for recovering.

Towing

If the machine has to be towed to a workshop after recovery, use a towbar connected to the towing device according to the above, or use a cable attached to the eyes inside the front axle mounting to the frame.

NOTE!

If there is no brake function (engine cannot be started), use a towbar.

The towing vehicle must always be at least as heavy as the machine being towed, and must have sufficient engine power and brake capacity to pull and brake the machines on eventual uphill and downhill grades.

Always tow the shortest possible distance, otherwise the transmission may be damaged.

When towing for a longer distance than 10 km (6.2 miles) or at a higher speed than 10 km/h (6.2 mph), the front and rear propeller shafts must be removed, see Removing propeller shafts. As an alternative, the machine can be transported on a trailer.

After towing/recovering

The following safety measures must be taken before the towbar or cable is removed after towing/recovering;

1. Place the machine on level ground.
2. Apply the parking brake.
3. Block the wheels to prevent the machine from rolling.

Transmission disengagement <https://truckmanualshub.com/>

The function controls transmission disengagement during simultaneous braking and informs the operator if there is a system malfunction.

Input signals	Output function conditions	Output functions
○ Output brake pressure, SE501 ○ Transmission disengagement, SW411	○ Transmission disengagement in position On ○ Output brake pressure > 1.8 MPa (261 psi)	○ Transmission disengagement
	○ Transmission disengagement in position On ○ Output brake pressure < 1.6 MPa (232 psi)	○ No transmission disengagement

Transmission oil filter

<https://truckmanualshub.com/>

The function monitors the condition of the transmission oil filter and informs the operator that the filter should be changed or if there is a system malfunction.

The transmission oil filter must be changed to avoid opening of the by-pass valve, resulting in reduced transmission performance or lack of function.

Input signals	Output function conditions	Output functions
Differential pressure, SE401 Transmission oil temperature, SE406	Differential pressure > 2.76 bar (40.0 psi) Transmission oil temperature > 50 °C (122 °F)	Amber central warning lamp ----- INFO ----- Clogged Transmission Oil Filter
Monitoring, SE406	System malfunction, signal outside limits	Amber central warning lamp ----- ERROR ----- Monitoring Transmission Oil Filter

Transmission oil pressure

<https://truckmanualshub.com/>

The function monitors the main oil pressure in the HT-transmission and informs the operator if transmission oil pressure is low or if there is a system malfunction.

Input signals	Output function conditions	Output functions
○ Engine speed, SE201 ○ Transmission oil pressure, SE405 ○ Directional gear	○ Low transmission oil pressure > 1 second Upon starting, no alarm is given for 5 seconds after the engine has started Alarm limits for transmission oil pressure: 1. < 0.65 MPa (94.3 psi) at 600 rpm 2. < 1.2 MPa (174.0 psi) at 1000 rpm 3. < 1.3 MPa (188.5 psi) at 2400 rpm Monitoring during gearshifting: • When engine speed is below alarm limit 2, transmission pressure is not monitored for 3 seconds • When engine speed is above alarm limit 2, transmission pressure is not monitored for 2 seconds	○ Warning lamp ○ Red central warning lamp ----- WARNING ----- Low Transmission Oil Pressure
	According to above, also: ○ Directional gear in Forward or Reverse	○ Buzzer
○ Monitoring, SE405	○ System malfunction, signal outside limits	○ Amber central warning lamp ----- ERROR ----- Monitoring Transmission Oil Pressure

Transmission oil temperature <https://truckmanualshub.com/>

The function monitors the transmission oil temperature and warns the operator if the temperature is too high or if there is a system malfunction.

If the transmission oil temperature rises further, the Engine Shut Down function is engaged and engine speed is limited to 900 rpm, see [Invalid linktarget].

The transmission oil temperature is also used as an input signal for:

- ☐ [Invalid linktarget]
- ☐ [Invalid linktarget]

Input signals	Output function conditions	Output functions
☐ Transmission oil temperature, SE406 ☐ Directional gear	☐ Transmission oil temperature above 110 °C (230 °F) > 2 seconds	☐ Warning lamp, gauge ☐ Red central warning lamp ----- WARNING ----- High Transmission Oil Temp. LE7355AG
	According to above, also: ☐ Directional gear in Forward or Reverse	☐ Buzzer
	☐ Transmission oil temperature above 120 °C (248 °F) > 2 seconds Engine Shut Down is active until the temperature drops > 2 °C (36 °F) below the temperature condition < 2 seconds	☐ Engine Shutdown
☐ Monitoring, SE406	☐ System malfunction, signal outside limits	☐ Amber central warning lamp ----- ERROR ----- Monitoring Transmission Oil Temp. LE7401AG

Op nbr 42172

[E 985 Hose](#)

Ratchet block, 1500 kg (3308 lbs), 1 block.

Lifting eyes, M16

1. Attach the lifting device as per [Invalid linktarget].
Transmission weight, L90D: **approx. 730kg (1610 lbs)**
Transmission weight, L120D: **approx. 850kg (1874 lbs)**

Figure 1

2. Lift the transmission into place in the machine.
Fit the attaching bolts against the flywheel housing.
Tightening torque: **54 Nm (40 lbf ft)**
3. Remove the supports under the engine and fit the transmission mounts.
Tightening torque, mount - transmission: **430 Nm (317 lbf ft)**
Tightening torque, mount - frame: **220 Nm (163 lbf ft)**
4. Remove the lifting device from the transmission.
5. Fit the front and rear propeller shafts.
6. Fit the pumps on the transmission.
7. Connect all hoses, cabling, sensors and pipes.
8. Fit the hydraulic tank, hood and cab.
9. Fill hydraulic oil and check the oil level in the transmission and the hydraulic tank.
Start and check the hydraulic pressures (see [Invalid linktarget]).
Check to make sure that there are no leaks.

Op nbr 42170

[E 985 Hose](#)

Ratchet block, 1500 kg (3308 lbs), 1 block.

Sling, 1000 kg (2205 lbs)

Lifting eyes, M16

NOTE!

Plug all pipes, hoses and connections when removing.

1. Release any pressure in the brake and hydraulic system by depressing the brake pedal 30–40 times and by moving the control levers in the gear lever carrier repeatedly to their end positions.
2. Drain the transmission and hydraulic oils.
Use E 985 when draining the hydraulic oil tank.
3. Remove the cab, see section 8.
4. Remove the hood plates on top of and from both sides of the hydraulic oil tank.
5. Loosen the following:
 - Exhaust pipe from the silencer.
 - Hoses from the expansion tank, 3 pcs.
 - Hose from hydraulic oil tank breather filter.
 - Suction hose from the turbocharger.
 - Hose from the dust indicator.
6. Lift away the cover plate from over the engine and the cover plates on both sides as a unit, together with the silencer, air cleaner and expansion tank.
7. Open the side panels on both sides of the hydraulic oil tank and remove the lower cover plates.
8. Lift out the hydraulic oil tank together with the frame around the tank.

Figure 1
Removing hydraulic tank

9. Remove the front propeller shaft from the transmission drive flange.
Remove the rear propeller shaft.
Propeller shaft weight: **approx. 38 kg**(68 lbs)

10. Remove the pumps from the transmission.
11. Disconnect all lines, pipes, cabling, etc. from the transmission.
12. Fit two M16 lifting eyes on the top side of the transmission.
13. Connect a lifting device as per [Invalid linktarget].
Transmission weight, L90D: **approx. 730kg** (1610 lbs)
Transmission weight, L120D: **approx. 850kg** (1874 lbs)

Figure 2

14. Relieve of weight bearing by slightly lifting the transmission. Remove the transmission mounts.
15. Block up the engine against the rear axle attachment and disconnect the transmission from the flywheel housing.
16. Pull the transmission forward and lift it out of the machine.

Figure 1

- A. filler pipe
- B. dipstick

Transmission oil level, checking

Check the oil level while the machine is still hot every 250 hours on the L90D and every 500 hours on the L120D.

- ☐ Park the machine on a level surface with the engine running at a slow idle.
- ☐ Move the gear selector to neutral.
- ☐ Apply the parking brake.
- ☐ Wait about two minutes to stabilise the level before taking a reading.

NOTE!

When the engine is switched off the level indicating pipe is filled with transmission oil. When the engine is started the torque converter fills with oil and the level in the pipe goes down. When the machine is cold the level may drop below the minimum mark. The level should be checked while the transmission is still hot.

Figure 2
Dropbox, L90D, filler pipe
Transmission, oil change

Hot oil can cause burns.

Change the oil every 2000 hours.

Drain the oil via the drain plug, see [Invalid linktarget].

Figure 3
Dropbox, L90D, dipstick
Oil is replenished via the filler pipe.

Oil capacity when changing:

L90D approx. 25 litres (6.6 US gal) and dropbox 4.7 litres (1.2 US gal)

L120D approx. 38 litres (10.0 US gal)

Oil grade, see [Invalid linktarget].

Dispose of waste oil and fluids in an environmentally safe and sound manner.

Suction strainer

Clean the strainer every 2000 hours.

The suction strainer is located in the bottom of the transmission housing.

Figure 4
Oil change, transmission, L90D

- A. drain plug
- B. cover, suction strainer
- C. draining, dropbox

1. Remove the cover and clean.
2. Fit a new gasket between cover and transmission housing.
3. Also change the O-ring on the suction strainer's connection pipe.
4. Fill up with oil.
5. Check that no leakage occurs.

Figure 5
Oil change, transmission, L120D

- A. drain plug
- B. cover, suction strainer
- C. draining, dropbox

Transmission, oil filter change

Change the filter every 2000 hours or, if the yellow information lamp comes on, at the same time as a warning text is shown on the display panel

The oil filter is of "spin on" type. It is accessible from underneath the machine on the left-hand side.

Figure 6
Oil filter, transmission, L120D

The filter cannot be cleaned but must be changed.

Figure 7
Oil filter, transmission, L90D

Figure 8
Breather filter

Breather filter, transmission/hydraulic oil tank

Change the filter every 2000 hours.

The filter is common to the transmission and the hydraulic oil tank.

The filter cannot be cleaned but must be changed.

Transporting a wheel loader on another vehicle

WARNING

Please pay attention to the safety instructions in the Operator's and Service Manuals concerned.

Turbo rotation without lubrication will damage the turbocharger bearing.

The following procedure must be taken prior to transporting the wheel loader on another vehicle or via rail transport:

Cover the exhaust pipe opening with a suitable cap or protection to shield against ancoming air flow. This particularly applies if the opening faces the travelling direction, see [Invalid linktarget].

Figure 1

Transport the wheel loader with the bucket facing the travelling direction

Transporting the machine

<https://truckmanualshub.com/>

On the platform of another vehicle

If the machine is lifted onto the platform of another vehicle the frame joint must be locked.

- Make sure the machine is completely straight and stop the engine.

Figure 1
Transport safety

- A. The front frame attaching eyes (ahead of the front axle retaining bolt) and in the towing device.
- B. Chock the wheels.
- C. Exhaust pipe guards.

Transport the machine with the bucket facing in the direction of travel.

- Take out the pin and move the frame joint lock over to its designated place, insert the pin and lock it.

If the machine is driven up onto another vehicle the frame joint should not be locked.

Lash the machine to the platform of the transport vehicle so that it cannot overturn or start rolling. The following attachment points as in [Invalid linktarget] should be used.

NOTE!

To avoid air being pressed down into the exhaust pipe during transport, which could damage the turbocharger, the exhaust pipe must be covered with a suitable form of protection (not plastic).

Figure 2
Lifting eyes
Lifting

Use the lifting eyes and lock the frame joint. Lifting eyes are located as in [Invalid linktarget].

Over gangway

Check that the gangway is of sufficient width and strength to ensure that it cannot move out of position.

In a lift or other confined space

- Reverse the machine in.
- Apply the parking brake and stop the engine before the lift is started.

<https://truckmanualshub.com/>

If the machine is to be driven from a loading dock to the platform of a truck or wagon, make sure that this vehicle is securely braked (wheels chocked) and that there is no danger of it overturning or heeling over in a dangerous manner when the machine is driven onto it.

In other respects follow the national rules and regulations.

Transporting wheel loader on another vehicle

<https://www.forkliftclub.com/>

In case the wheel loader is transported on another vehicle or by railroad, it is important to cover the exhaust pipe outlet with a cap or other suitable protection. This applies especially when the exhaust pipe outlet faces the travel direction. This is to avoid damaging the turbocharger bearing, which may be damaged if the turbo rotates without any lubrication.

Travel speed

<https://truckmanualshub.com/>

The function calculates and notifies the operator of the travel speed or if there is a system malfunction.

Travel speed is used as an input signal by several functions.

Setting of units km/h or mph is performed with the display panel keypad.

Input signals	Output function conditions	Output functions
Propeller shaft speed, SE403 Tyre radius[T1]	Propeller shaft speed Tyre radius	Travel speed in km/h or mph 1230 rpm F2 09:3420° 22 km/h
Monitoring, SE403	System malfunction, signal outside limits	Amber central warning lamp -----ERROR----- Monitoring Travelling Speed Er km/h 1230 rpm F2 09:3420° Er km/h

[T1]Setup via service panel.

Troubleshooting tips

<https://truckmanualshub.com/>

The machine has poor pulling power

The problem may be in the engine or in the hydraulic transmission.

Check the following:

- Engine stall speed, see Section 2.
If the stall speed is too low, the malfunction is likely in the engine.
- If the engine stall speed is within specifications or higher, the malfunction is likely in the hydraulic transmission.
- Check that 1st gear engages by measuring the hydraulic pressure of the 1st gear clutch. If poor pulling power is combined with an abnormally warm transmission, the problem may lie in the torque converter.
- As a first measure, check the torque converter pressure.
- Check the main pressure and clutch pressure for the clutch in question. Correct main pressure combined with low clutch pressure could be caused by a leak between the oil distributor and the clutch shaft or a malfunction in the gear selector valve.

It is not possible to shift gears

If gears do not engage, the following may be the possible causes:

- Electric malfunction.
- Malfunction of the gear selector valve.
- Hydraulic malfunction or other problem in clutch shaft.

Check the main pressure and the clutch pressure for the clutch in question.

If correct main pressure is obtained, but the clutch pressure is low, this may be due to a leak between the oil distributor and clutch shaft or a malfunction in the gear selector valve.

If correct main pressure is obtained but there is no clutch pressure, there may be an electric malfunction or a malfunction in the gear selector valve.

A temporary operation interruption (pressure loss) may be due to the following:

- Electric malfunction (poor contact) etc.
- Binding valve spool in gear selector valve.
- Leak between oil distributor and clutch shaft (works when oil is cold, operation interruption when oil is warm).

Tyre radius

<https://truckmanualshub.com/>

This function provides input data for travel speed calculation.
Tyre size is set with the service display unit.

L90D

Tyres	Tyre radius	Axle ratio
20.5"	745 mm (29.3 in)	18.37:1

L120D

Tyres	Tyre radius	Axle ratio
17.5"	675 mm (26.6 in)	23.11:1
23.5"	815 mm (32.1 in)	23.11:1

Applies to Wheel Loaders						

Tyres, various types

WARNING

Please pay attention to the safety instructions in the Operator's and Service Manuals concerned.

This Service Bulletin is to be considered as technical information only and is not subject to any reimbursement programs outside normal warranty.

This information is to be used as a guideline for the correct use and replacement matching of tyres on all wheel loaders.

There is no difference between a new and a worn tyre as regards the rolling circumference of one and the same tyre.

The rolling circumference can vary considerably between tyre manufacturers and the application type of tyre used on the the equipment, (loader tyres, transport tyres, and tyres intended for specific applications).

If tyres from different manufacturers or types are used on the same machine the drivetrain components may be damaged by changed ratios by tyre differences.

In most cases, tyres can be mixed from different manufacturers providing that the same tyre classification type is the same, for example 26.5 R25 L3.

The designation represents the following:

26.5 =	Tyre width
R =	Radial tyre
25 =	Rim diameter
L =	Loader and Dozer (Wheel Loader)
3 =	Industrial code (application)

Problem can arise when a different types of tyres are mixed on a machine. An example of this is installing a 26.5 R25 L3 tyre from one manufacturer, with a 26.5 R25 L4 from another manufacturer or with a 26.5 R25 L5 tyre.

NOTE!

L5 tyres should not be mixed with other tyre codes on the machine.

The tyre code designation represents the following:

L2 =	Traction
L3 =	Rock (non aggressive material)
L4 =	Rock deep tread
L5 =	Rock extra deep tread (aggressive material)

The rolling circumference between the example tyres shown will be greater than what is allowed. Using tyres intended for other applications can result in premature tyre wear and drivetrain issues.

Similar problems can occur when re threaded tyres are used. When installing re threaded tyres, make certain the same type of tyre size and type is replaced.

It is not recommended to use tyres with a difference in rolling circumference that exceeds 1.5% ratio side to side and 2% ratio front to rear.

Figure 1

Max. permissible differences in rolling circumference

The tyre rolling circumference cannot be measure in a practical manner. Specification data from the tyre manufacturer must be obtained, then a calculation made, using the allowable variation percentages given.

Example:

Tyres on front axle: 23.5R25 RT-3B L3(rolling circumference = 4855 mm) <https://truckmanualshub.com/>

Tyres on rear axle: 23.5R25 GP-4D L4 (rolling circumference = 4880 mm)

Calculation: $4880 / 4855 = 1.005 \approx 0.5\%$

Conclusion: The difference of the rolling circumference between front and rear axle is 0.5%. It is acceptable to mix these tyres since the difference is within max. permissible difference.

NOTE!

Remember that e.g. chains affects the rolling circumference.

Op nbr 21412

[999 3590 Gear](#)

Figure 1

NOTE!

Clean thoroughly around the valve covers before starting any adjustments.

1. Remove the hose clamp from the hose to the intercooler and the pipe between the intercooler and the turbo.
2. Remove the valve covers.

NOTE!

Lift the silencer away or detach it and raise it at least 10 mm so that the front valve cover can be removed.

Remove the covers over the flywheel marking and the flywheel ring gear.

Rotate the crankshaft with gear 999 3590.

Figure 2

| 2 | Ratchet handle |
| 3 | Flywheel marking |

3. Rotate the flywheel in the engine's direction of rotation by rotating the tool in the direction of the arrow as shown in [Invalid linktarget] until the no. 1 cylinder piston is at TDC (0 ° on the flywheel and the no. 6 cylinder valves "rock"). Adjust valves 1, 2, 3, 6, 7 and 10, see [Invalid linktarget] and [Invalid linktarget].

<https://truckmanualshub.com/>

Figure 3
Valve clearance (cold/warm engine)

Figure 4
Adjusting valves

4. Rotate the flywheel one more turn in the rotational direction of the engine (0° on the flywheel and the no. 1 cylinder valves "rock").
Adjust valves 4, 5, 8, 9, 11 and 12, see [Invalid linktarget] and [Invalid linktarget].
5. Refit the valve covers with new seals.

Vehicle control unit V-ECU, functional description

The vehicle control unit is the controlling unit in the system and maintains overall machine-related functionality as well as making overall strategic decisions.

The vehicle control unit is located by the electrical distribution box behind the operator's seat.

The vehicle control unit is connected to the other control units by way of data link for coordination with other control units.

Figure 1
Vehicle control unit V-ECU
Functions

- Coolant temperature: Adjustment, control and monitoring of radiator fan
- Calculation of vehicle travel speed
- Parking brake: monitoring and control
- Gearshifting strategy
- Request for limitation of engine rpm and/or torque
- System voltage monitoring
- Monitoring of hydraulic oil temperature
- Monitoring of transmission oil: Pressure, temperature and filter
- Engagement of preheating

Ventilation servo casing

WARNING

Please pay attention to the safety instructions in the Operator's and Service Manuals concerned.

This SB is to be considered as a technical information and comprises normal warranties within the rules for the same.

During certain operations the servo valve and the servo hoses become warm and may cause a rise in temperature in the cab. This can be remedied by removing the warm air from the servo casing through ventilation.

Working instructions

1 a. On machines with lifting and tilting function, but without third/fourth hydraulic function:

Route a hose through the retainer for servo hoses, see item 1 in Fig. 1. Use one of the vacant holes.

Figure 1

1. Hose
2. Strip clamp

1 b. On machines with third/fourth hydraulic function:

As there are no vacant holes, one has to be drilled, see Fig. 2, item A.

Figure 2

2. The hose should be routed from the servo valve and open out under the cab. To obtain the intended ventilation effect, the fan should be run at least at position 2 and fresh air drawn from outside the cab – not set to recirculation.

Item in Fig. 1	Designation	Part No.
1	Hose	4803752
2	Strip clamp	4881439

Volvo Product incident/accident report & Interview Form

NOTE!

Please pay attention to the safety instructions in the Operator's and Service Manuals concerned.

This Service Bulletin is to be considered as technical information only and is not subject to any reimbursement programs outside normal warranty.

Cause and action

In our efforts to build safe products and due to different governing authorities' requirements Volvo needs you to report every incident/accident or when there has been any risk of an incident/accident that becomes known to you where any Volvo machines have been involved.

NOTE!

Make sure to pay attention to laws and regulations in the country where the machine concerned operates.

For legal information and advice contact your Regional office.

Scope

Volvo CE defines a reportable incident/accident as:

"An unexpected and/or undesired event resulting in (or which reasonably could have resulted in) personal injury, death and/or property damage (to the machine itself or otherwise)."

Priority

It is of utmost importance that reports are sent in quickly and that they contain as many facts as possible about the incident/accident. This helps us rapidly evaluate the event and determine what actions are appropriate. We consider it a mutual obligation that incidents/accidents are reported and followed up.

NOTE!

Important! Swift reporting is very important, especially in connection with fires when clues and any evidence may be destroyed quickly by the elements (rain, snow, wind, etc.)

Depending upon the nature of the event, it may be necessary to contact Volvo CE immediately to gain direction on how to proceed further. If Volvo CE employees are not available to conduct an immediate inspection we may need to ask the Dealer personnel to conduct a product inspection to assist with the investigation and/or preserve the evidence.

Reporting

- Within 24 hours after the incident/accident occurred or after first receipt of information regarding such an event, the regional manager at Volvo CE's technical support department shall have been informed about the incident/accident.
- The completed report shall be submitted within three working days after the occurrence of the accident/incident.
- In order for Volvo to consider performing an incident inspection/fire inspection the machine must be undisturbed. No repair may be started, nor may parts or components have been removed from the machine until clearance is given from Volvo CE. Decision of clearance/inspection will be notified by Volvo CE within five working days.
- The report will be used by Volvo CE in our continuous work to improve the safety and quality of Volvo CE products. It may also be used as important information for decisions regarding economical compensation or in a legal process.
- **NOTE!**
 - Any reimbursement request may be rejected if parts, components or remains connected to the incident have been removed or destroyed due to work in or on the machine.
 - Any reimbursement request may be rejected due to delayed reporting to Volvo CE's technical support department.
 - Any reimbursement request will be rejected due to lack of reporting.

Copy and fill in the form below.

NOTE!

The report is also available as an editable pdf-form in Techline (SB 000 WLO 241 K_GB). It can be downloaded, filled in, and e-mailed (do not send it through Techline)

IMPORTANT!

Send the form to the relevant regional office. The regional office is responsible for forwarding all information to the relevant area manager for technical matters at Volvo Construction Equipment.

NOTE!
For Region North America, the report must be sent to e-mail: incidentreport@volvo.com.

Description of the incident/accident

Be objective in describing the event. Avoid personal opinions and/or speculations! It is extremely important to record the facts simply and completely.

Include observations about other conditions and circumstances that may be helpful in understanding the event.
To make it possible for Volvo CE to make an initial evaluation of the incident/accident, attach photographs as well.
Take as many photos as possible, close-ups and from a distance. Describe, in detail, what is shown in each of the photos.
These photos may be of invaluable help in the initial phase of an investigation.

To save the completed form digitally, it must be printed out as a file and saved digitally!

NOTE!
Only reports written in English are accepted.

Volvo standard tightening torques<https://truckmanualshub.com/>

The tightening torques in the following tables apply to the bolts and nuts with tensile strengths as noted below. The tables should be regarded as a general instruction for tightening torques of bolts and nuts which have no specified values indicated.

NOTE!
Torque values should be increased by 10% for flange bolt type U6FS. Bolts and nuts must be cleaned and lubricated with oil.

TENSILE STRENGTH 8.8 Metric coarse and fine threads

en/rear window

The washer fluid reservoir is located behind the side cover (cab filter access cover) on the right-hand side of the machine.

- Be sure to have sufficient antifreeze in the washer fluid when the outside temperature drops below freezing point.
- Top up as necessary.
- Check that the reservoir filler cap is screwed on firmly and that the reservoir is clean externally. Odours may otherwise spread to the cab.

Water separator improvement

WARNING

Please pay attention to the safety instructions in the Operator's and Service Manuals concerned.

This SB is to be considered as technical information and comprises normal warranties within the rules for the same.

Cause

Less fuel supply to engine.

Action

Check water separator as the following instruction.

V1027149

Figure 1
Water separator

1. Filter head
2. Filter element
3. Plastic bowl

Descriptions

1. Problems of Racor water separator are related to the gasket between the filter element and the filter head, incorrect location of flapper, dust or dirt on flapper valve seat and incorrect location of flapper lock pin.
2. When mounting and tightening filter head and filter element together, the filter element gasket can expand inwards and make contact with flapper valve.
3. The flapper valve in the filter head should open during pump stroke and close when releasing the pump. The flapper valve is

supposed to close the bypass hole. If the gasket interferes with the flapper valve, fuel can not be supplied to engine during pump stroke.

4. The flapper valve can not be pressurized in case there is dust or dirt on flapper valve seat, then pump supplies less fuel to engine.
5. It is possible that the flapper valve is not in place which results in less fuel supply to engine.

Parts comparison

The filter element gasket was changed from circle type to square one to prevent it from interference with flapper valve and part numbers were changed as shown on table 1.

Figure 2
Dust on flapper valve seat
Part comparison

Part name	Old part number	New part number	Remarks
Water separator complete assembly	11110471	11110670	Gasket is included in filter element.

Filter head	11713138	11713138	
Plastic bowl	3836024	3943382	

Figure 3
Flapper valve incorrect location
Instruction

1. Check the flapper valve seat for dust or dirt as shown in Fig.2. Clean the surface with a soft cloth to remove the dirt, if necessary.
2. Check that the flapper valve is in its correct position as shown in Fig.3. Reposition the flapper valve, if necessary.
3. Check that the flapper valve lock pin is in position as shown in Fig.4. Reposition, if necessary.
4. Check that the filter element gasket does not have contact with the flapper valve as shown in Fig.5 Change the filter element, if necessary.

Wear indicator, description

<https://truckmanualshub.com/>

The wear indicator consists of a pin which has been pressed into a spring pin, to an individually adapted length for each hub reduction.

The wear indicator is permanently mounted in the axle housing and should be used for checking wear of each individual brake disc.

WARNING!

Read all signs and instructions on the machine and the safety instructions in the operators manual, before you start working on the machine.

The installation instructions are based on the use of special tools, the E-tool and standard tools generally available on the market, and also on our operators manuals and service manuals.

The equipment should be installed by qualified personnel of an authorised workshop.

Volvo Construction Equipment Group disclaims all responsibility if tools and work methods other than those described in the instructions are used.

We consider that no special installation instructions are required for fitting this equipment.

To facilitate the fitting we enclose:

VARNING!

Läs alla skyltar och anvisningar som finns på maskinen och säkerhetsinstruktionerna i instruktionsboken innan Du börjar arbetet på maskinen.

Monteringsanvisningen är baserad på användning av specialverktyg, E-verktyg och i allmänna handeln tillgängliga standardverktyg samt instruktions- och verkstadshandböcker.

Utrustningen ska monteras av behörig person på auktoriserad verkstad.

Volvo Constuction Equipment Group fransäger sig allt ansvar om andra verktyg eller arbetsmetoder än de i anvisningen beskrivna kommer till användning.

För montering av denna utrustning anser vi, att någon speciell monteringsanvisning inte erfordras.

För underlättande av montering bifogar vi:

NOTE! The main headlamp has to be removed to get to the spotlight wiring.

Working hydraulic system, description <http://www.truckmanualshub.com/>

The working hydraulics hydraulic system mainly consists of an oil tank, hydraulic oil pumps, servo-controlled control valve, servo valve, solenoid valve(s), hydraulic oil cooler and control cylinders.

The pressure limiting valve limits the maximum pressure in the hydraulic system.

The oil tank, which is common to the brake system, steering system and the working hydraulics, is equipped with a return oil filter. The tank is ventilated through a separate breather filter.

The servo pump is a vane pump that is common to the servo system and the brake system. The pump is included in the hydraulic system double-pump and is mounted on the hydraulic transmission left power take-off. The servo system has a separate pressure limiting valve that restricts the pressure in the servo circuit.

The servo valve, which receives oil from the servo pump, has a closed centre. This means that the oil flows via a pressure limiting valve, without passing the servo valve, directly to the tank in neutral position. The servo valve consists of three sections, one for each hydraulic function. The servo valve is equipped with detent solenoids (electromagnets) for float, tilt and boom kickout positions as well as a microswitch for engaging the float position on the lift/lower function.

A pressure proportional to the lever stroke is sent out with the servo valve to the spool for each function. The pressure works against the return spring of the spool. The spool movement (i.e. opening to each cylinder/function and the movement speed of the function) thus becomes proportional to the lever stroke.

The pump for the working hydraulics is a vane pump that is included in the hydraulic system double-pump and is driven by the hydraulic transmission left power take-off.

The control valve, which receives oil directly from the working hydraulics pump, has an open centre. This means that the hydraulic oil passes through the control valve and directly to tank when the control valve spools are in neutral position. The control valve consists of three sections, 3rd hydraulic function, tilt function, and lift/lower function with float position.

Float position means that the plus and minus sides of the lift cylinders are connected through the return line. The minus side is directly connected and the plus side has a connection to the return line via the back-up valve. The spool in each section is controlled by the servo valve. Each section is equipped with a load-holding valve which ensures the position of the cylinders when a movement has been completed, and counteracts undesired movements when starting. Shock valves limit the pressure in the tilt and lift functions during shock loads.

The tilt and lower functions have anti-cavitation valves which ensure adequate oil in the cylinders.

The back-up valve pressurizes the return-oil during lowering and forward tilt, and contributes to improved oil filling.

The solenoid valves for control of different functions receive their oil from the hydraulic system servo circuit. The solenoid valves control engagement of the float position and differential lock. In addition, there are solenoids for optional functions.

The hydraulic oil cooler, located together with the engine's coolant radiator, is connected between the servo system pressure limiting valve and the return oil filter for the hydraulic oil tank.

Control cylinders consist of a tilt cylinder, two lift cylinders, and any cylinders for other equipment (optional equipment).

There may be a cylinder for hydraulic locking of the attachment bracket (optional equipment).

The boom is built of two arms attached to the upper part of the front frame. The arms are joined to form a single rigid construction, which also carries a linkage system for transferring tilt movement. The lift cylinders are well protected with high attachment points in the front frame. The placement of the tilt cylinder and the design of the linkage system allow for parallel movement and high breakout torque throughout the entire lifting range. These characteristics have given the loader linkage its name - TP-linkage.

T stands for torque and P stands for parallel. The bucket can be attached to a special attachment bracket or mounted directly to the boom.

[999 3831 Support](#)

[11 666 020 Pressure gauge 0–25 MPa \(0–3625 psi\)](#)

[11 666 037 Hose](#)

Figure 1
Securing boom

1. 999 3831

The following applies when checking:

Temperature: **Normal operating temperature**

Engine speed: **High idle speed**

NOTE!

Always use the support to secure the boom when working under a raised boom.

1. Remove the cover plate in the front frame.
2. Connect the pressure gauge to the pressure outlet.

Figure 2

Control valve seen from underside of machine

<https://truckmanualshub.com/>

1. Pressure limiting valve, working pressure
2. 11 666 037 and 11 666 020
3. Pressure outlet for working pressure

Checking working pressure

3. Machines equipped with 3rd or 3rd/4th hydraulic function:

Disconnect the hydraulic hoses for any attachments that are connected to the 3rd or 3rd/4th hydraulic function, then slowly move the control lever to the end position and read off the pressure.

Machines not equipped with 3rd or 3rd/4th hydraulic function:

Check to make sure that the float position is not engaged and slowly move the control lever towards the lower position, then read off the pressure when the cylinders reach their end position.

Working pressure: **22.5 MPa (3263 psi)**

Adjusting working pressure

4. Adjustment is performed on the pressure limiting valve on the control valve, pos 1 [Invalid linktarget]. The pressure increases when the screw is screwed in. One full turn changes the pressure approx. 10 MPa (1450 psi).
5. Restore the machine to operating condition.
