Rest bunk kit for day cabs

- Even a short pause can be a restful break
- Easily used. Folds down in less than 30 seconds!
- Folded up against the rear wall of the cab, it hardly takes up any space
- The rest bunk complies with all Volvo safety requirements, which among other things means it is fire retardant and securely fitted. Sturdy mountings and locking device mean there is no risk of the bunk dropping down while the vehicle is on the move
- Supplied with all fittings and complete instructions
- Removable, washable cover
- Telescopic legs to adapt to several models of the FH/FM

Passenger bench	FL, L4H1C	20866497

Armrests

- Improves safety
- Comfortable and relaxing
- Simple, stable installation
- Complies with Volvo's strict safety demands on cab interior fittings, meaning among other things that they are fire retardant and have secure and strong mountings
- Armrests to provide that extra comfort on long runs. They help you sit better, thereby reducing back trouble and fatigue.
- Volvo armrests are quickly and easily fitted. The armrests are adjustable by means of a knob.

Armrest with leather upholstery

Broad and soft armrest trimmed in exclusive leather. Available for the passenger's and driver's seats.

Cushions

Head restraint cushion

Particularly good for long journeys. The cushion provides comfortable support for neck and shoulders, and reduces the risk of strain and injury.

Description	Part No.
Head restraint cushion	21110677

Backrest cushion

Covering vast distances can be a strain on the back. The cushion provides comfortable lumbar support and reduces the risk of strain and injury.

Description	Part No.
Backrest cushion	21110661

Head restraints

- Improves safety
- Comfortable and relaxing
- Simple, stable installation
- Matches the cab trim
- Satisfies Volvo's strict safety demands

The head restraints are important to safety - they give protection to the upper spine from whiplash injuries.

Volvo head restraints are quickly and easily fitted. They match the trim and interior colours of the cab.

All Volvo head restraints comply with Volvo's strict safety demands on cab interior fittings, meaning among other things that they are fire retardant and have secure and strong mountings.

Rubber mats

- Make it easier to keep the cab clean
- Save the original floor mats
- Meets all Volvo's requirements concerning cab trim, for example flame-resistance, durability, colour-fastness etc.
- The mats of wear-resistant natural rubber are shaped to the floor of Volvo cabs. This gives an excellent fit
- Raised edges, meaning that water, snow, grit, sand, etc stay on the mat

Some FH mats have pre-marked panels to simplify cutting to suit several variants. The N/NL mats have pre-marked panels to simplify cutting to suit all variants of the LHD N/NL models.

Description	Suitable for	Part No.
Storage box, complete kit	FL, KH	20400351

Storage box, low FL

- Spacious and easy accessible storage box
- Lockable, which increases security
- Facilitates document handling and helps to keep things in order

This practical lockable engine tunnel storage box is especially designed for the comfort cab (FL L2H1) in combination with the two-part rest bed (REST1878).

The storage box is mounted at the engine tunnel against the rear cab wall. The extensible drawer has space for documents, maps and personal belongings. The drawer has a volume of 44.5 litres.

The drawer is divided into one large compartment and a smaller section with its own lid, making it easy to keep things in order inside the box. An external compartment, on the driver's side, has space for two large bottles as well as small items. The upper face of the box is flat and thus forms an excellent writing top. When the bunk is folded down, the storage box serves as a centre support for the bed.

Description	Suitable for	Part No.

Storage box, high FE

- Easy accessible and spacious box with exceptional storage capacity
- Lockable, which increases security
- Facilitates document handling and helps to keep things in order
- Offers convenient access to 12 V and 24 V power supply

This practical and very spacious lockable storage box on the engine tunnel is especially designed for the comfort cab (L2H1) without bed.

The storage box is mounted on the engine tunnel against the rear cab wall. The extensible drawer has space for documents, maps and personal belongings.

The drawer is divided into one large compartment and a smaller section with its own lid, making it easy to keep things in order inside the box. An external compartment, on the driver's side, has space for two large bottles as well as small items. When the drawer is pulled out, the fl at upper face forms a table for writing or eating.

On the top of the storage box there is another large compartment with a lid. There is space here for a laptop computer or documents that have to be easily accessible. The compartment features two power sockets, 12 V and 24 V, for extra equipment.

The upper compartment has a volume of 21.3 litres and the lower is 44.5 litres.

Compressor refrigerator

- Compressor refrigerator, 25 l
- Normal mode +6°C
- Interior lighting
- Located in rear storage shelf
- High cooling capacity
- Crash tested – meets Volvo's safety requirements
- Drain hose for condensation water
- Switches off automatically when the cab is tilted
- Starts automatically when the cab is upright
- Battery sensor
- Wiring included
- Power demand 24 V/3 A

Technical data

The refrigerator is fitted with an integrated battery sensor that ensures that the refrigerator does not cause destructive battery discharge. The battery sensor closes at 22 V and opens at 24 V.

The refrigerator should be emptied and switched off before the cab is tilted. It is recommended that the roll-front door for the refrigerator be kept closed while driving.

Description	Suitable for	Part No.

Combined refrigerator/freezer

Refrigerator with freezer inside cab

The high capacity refrigerator with freezer has a total volume that holds 26 litres and it is fitted in the extensible drawer under the bed in the FH sleeping cabs, which makes it easily reachable for the driver. The refrigerator is of compressor type and has considerable cooling performance, automatic chilling and battery monitoring.

It maintains +4°C in the refrigerator and -12°C in the freezer, even at ambient temperatures over +40°C.

The refrigerator is crash-tested and satisfies the high safety requirements of Volvo.

Specifications	Freezer	Refrigerator
Volume	7 litres	19 litres
<u>Inside dimensions (cm):</u>		
Depth	32	52 (33*)
Height	13	14
Width	17	28 (25*)

*) The refrigerator box is formed after the compressor compartment and will therefore not have a regular rectangular shape.

*) Cable set no. 20393826 is included in the kit

Refrigerator

Refrigerator, 27 litres

Compressor-powered refrigerator with excellent cooling properties, fitted under the bed in a pull-out drawer. The refrigerator features interior lighting, automatic temperature maintenance and battery monitoring.

On the top of the refrigerator there is a display that shows the temperature and any fault message. Using the minus or plus button, it is possible to set the temperature between +2 °C and +12 °C.

Refrigerator divider

Makes it easier to keep things neat and tidy inside the refrigerator. Kit includes 2 divider walls and 4 spacers.

Microwave oven

- Fits on the rear storage shelf FH/FM H2, FH H3
- Four different choices of output 150, 250, 350 or 500 W
- Interior light, rotating plate and a variable timer with second scale, which can be set up to 30 minutes.
- 24 V/31 A
- The electrical connections meet Volvo's safety requirements
- A practical bracket for secure fitting on the storage shelf
- A secure locking mechanism on the oven
(We recommend that the roll-front door be closed while driving)
- EMC-tested (Electromagnetic compatibility)

The oven meets Volvo's EMC requirements, which means that it does not produce any electromagnetic radiation that might interfere with any other electronic components on board the vehicle.

Mattress, Luxury

Two layers of springs together with new foam increases the driver comfort to a new level. In order to obtain the best sleeping comfort the mattress has a layer of pocket spring cores with individual springing (8 cm high). This makes the mattress adapt to different shapes of the human body, and different postures during a nights sleep. The second layer of pocket springs consists of 5,5 cm high pocket spring units, which are stable in dimension, and has excellent pressure relief. This secures excellent sitting comfort. The mattress has the same structure all over. This ends up in a product with better quality and comfort compared to other available concepts. The mattress is heat treated, and produced following the highest quality standards.

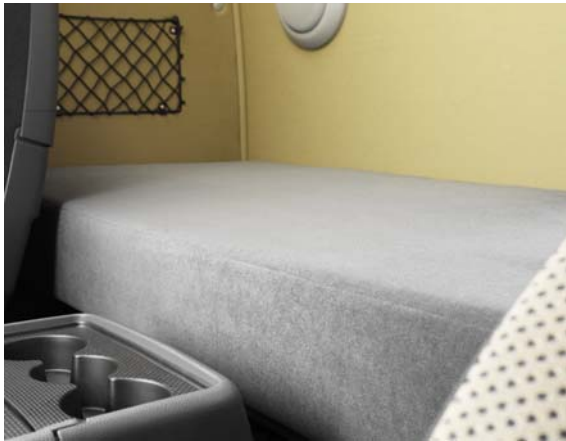

This luxury mattress is only available as an accessory. It is suitable for the Volvo FH/FM bed.

Technical specifications:

- Pocket Original, height 8 cm, Ø 1,6 mm
- X-pocket, height 5,5 cm, Ø 1,9 mm
- Polyten lid
- Fabric: Angora dark embossed

Description	Suitable for	Part No.
